### QUESTION 1

You have a Microsoft Office 365 subscription.

You need to prevent guest users from deleting channels from a Microsoft Teams team.

What should you use?

- A. the Microsoft 365 admin center
- B. the Azure Active Directory admin center
- C. the Microsoft Teams client
- D. the Security and Compliance admin center

Correct Answer: C

MS Teams Client>Manage Team>Settings tab>Under Guest Permissions section deselect "Allow guest to delete channels"

---

### QUESTION 2

You need to ensure that file sharing during Teams chats meets the technical requirements of the marketing department. What should you do?

- A. Create a retention policy for the SharePoint sites location.
- B. Enable Customer Lockbox.
- C. Create a retention policy for Teams chats.
- D. Create a data loss prevention (DLP) policy for Teams chat and channel messages.
- E. Create a retention policy for the OneDrive accounts location.

Correct Answer: A

---

### QUESTION 3

#### DRAG DROP

You have a Microsoft 365 E5 subscription that uses Microsoft Teams.

You need to ensure that the users in your organization can communicate with external users who use Teams for personal use.

How should you complete the PowerShell cmdlets? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Values	Answer Area
<input type="text" value="-AllowFederatedUsers"/>	Set-CsTenantFederationConfiguration <input type="text"/> \$true <input type="text"/> \$true
<input type="text" value="-AllowTeamsConsumer"/>	
<input type="text" value="-AllowedDomains"/>	
<input type="text" value="-AllowPublicUsers"/>	

Correct Answer:

Values	Answer Area
<input type="text"/>	Set-CsTenantFederationConfiguration <input type="text" value="-AllowFederatedUsers"/> \$true <input type="text" value="-AllowTeamsConsumer"/> \$true
<input type="text"/>	
<input type="text" value="-AllowedDomains"/>	
<input type="text" value="-AllowPublicUsers"/>	

Set-CsTenantFederationConfiguration manages federation configuration settings for your Skype for Business Online tenants. These settings are used to determine which domains (if any) your users are allowed to communicate with.

Box 1: AllowFederatedUsers

Enable Teams federation.

Set-CsTenantFederationConfiguration -AllowFederatedUsers \$true

-AllowFederatedUsers

When set to True (the default value) users will be potentially allowed to communicate with users from other domains. If this property is set to False then users cannot communicate with users from other domains regardless of the values

assigned to the AllowedDomains and BlockedDomains properties.

Box 2: -AllowTeamsConsumer

-AllowTeamsConsumer

Allows federation with people using Teams with an account that's not managed by an organization.

Incorrect:

-AllowedDomains

Function to add allowed domain for Teams federation.

function Enable-TeamsFederationForAllowedDomainsOnly

---

-AllowPublicUsers

When set to True (the default value) users will be potentially allowed to communicate with users who have accounts on public IM and presence providers such as Windows Live, Yahoo, and AOL. The collection of public providers that users can actually communicate with is managed by using the Set-CsTenantPublicProvider cmdlet.

---

#### QUESTION 4

You work as a Systems Administrator for your company. The company has a subscription to Microsoft 365. All users in your company have a Microsoft 365 E3 license.

All users use Microsoft Skype for Business Online for collaboration.

You plan to deploy Microsoft Teams phones to all users.

A company policy has the following requirements for the Microsoft Teams phones:

The screen saver must be enabled and configured to start after 60 seconds.

Screen capture must be enabled.

You need to configure the Microsoft Teams phones to meet the policy requirements.

Which of the following actions should you perform?

- A. Configure the Teams settings under Org-wide settings in Microsoft Teams admin center.
- B. Configure a Teams App Setup policy in the Microsoft Teams admin center.
- C. Deploy a configuration profile in the Microsoft Teams admin center.
- D. Configure a Teams policy in the Microsoft Teams admin center.

Correct Answer: C

---

#### QUESTION 5

You work as a Systems Administrator for your company. The company has a subscription to Microsoft 365. All users in your company have a Microsoft 365 E5 license. All users in the company use Microsoft Teams for collaboration.

A developer in the company is developing a custom app to be used in Microsoft Teams.

The developer wants to test the app in Microsoft Teams before releasing the app for use by all company users. The developer has a .zip file containing an app package for the custom app.

You need to enable the developer to upload the app to Microsoft Teams for testing. The app must be available to the developer only in Microsoft Teams.

What should you do?

- A. Modify the global app setup policy.
- B. Configure an app setup policy that applies to the developer only.
- C. Modify the global app permission policy.
- D. Configure an app permission policy that applies to the developer only.

Correct Answer: B
