QUESTION 1

What API policy would be LEAST LIKELY used when designing an Experience API that is intended to work with a consumer mobile phone or tablet application?

- A. OAuth 2.0 access token enforcement
- B. Client ID enforcement
- C. JSON threat protection
- D. IP whitelist

Correct Answer: C

QUESTION 2

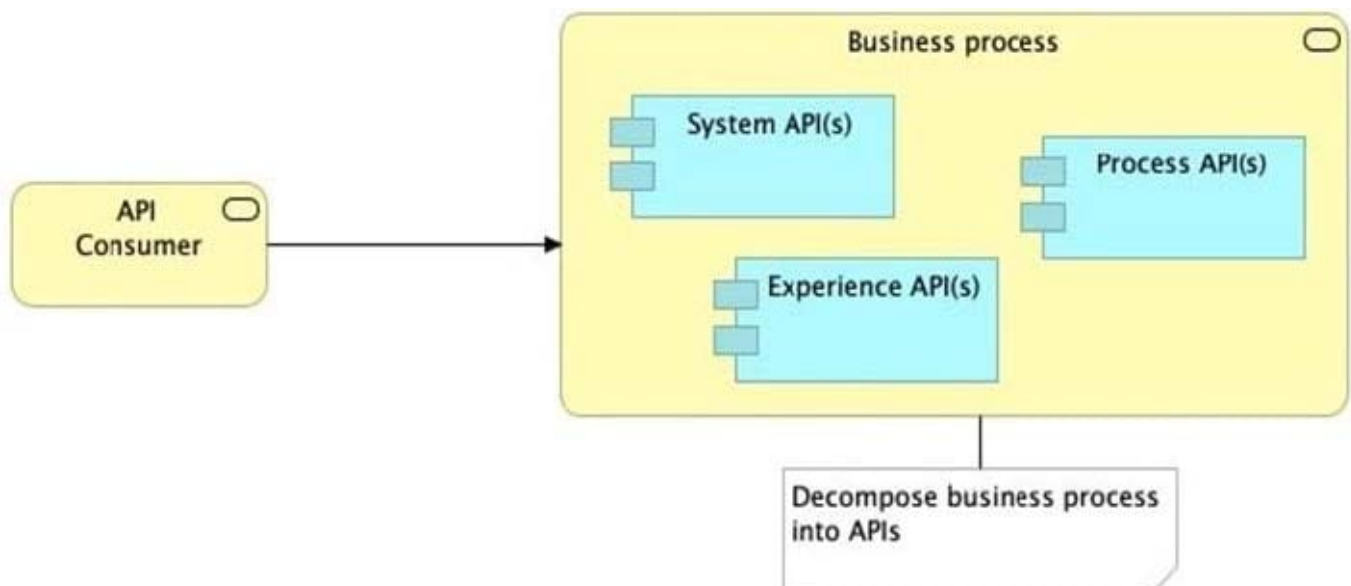

What condition requires using a CloudHub Dedicated Load Balancer?

- A. When cross-region load balancing is required between separate deployments of the same Mule application
- B. When custom DNS names are required for API implementations deployed to customer-hosted Mule runtimes
- C. When API invocations across multiple CloudHub workers must be load balanced
- D. When server-side load-balanced TLS mutual authentication is required between API implementations and API clients

Correct Answer: B

QUESTION 3

Refer to the exhibit.

What is the best way to decompose one end-to-end business process into a collaboration of Experience, Process, and of System APIs?

- Ⓐ. Handle customizations for the end-user application at the Process API level rather than the Experience API level.

- Ⓑ. Allow System APIs to return data that is NOT currently required by the identified Process or Experience APIs.

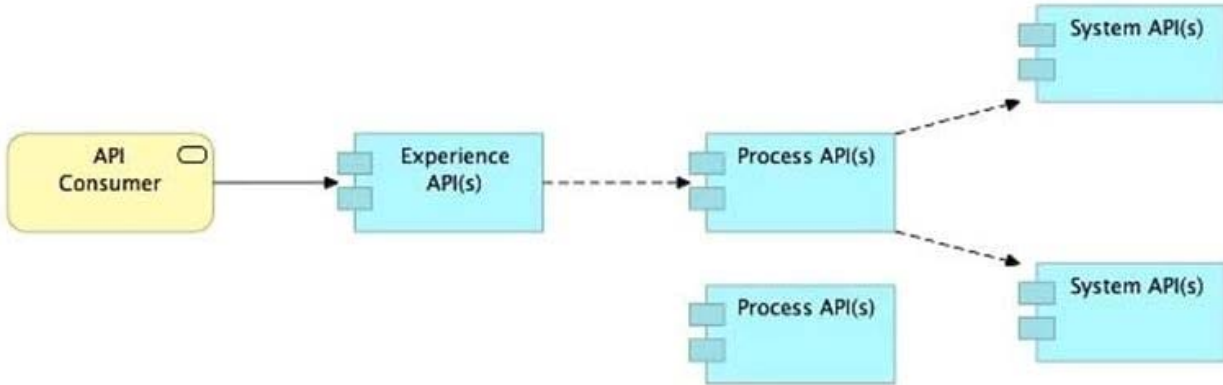

- C. Always use a tiered approach by creating exactly one API for each of the 3 layers (Experience, Process and System APIs).

- D. Use a Process API to orchestrate calls to multiple System APIs, but NOT to other Process APIs.

- A. Option A
B. Option B
C. Option C
D. Option D

Correct Answer: C

QUESTION 4

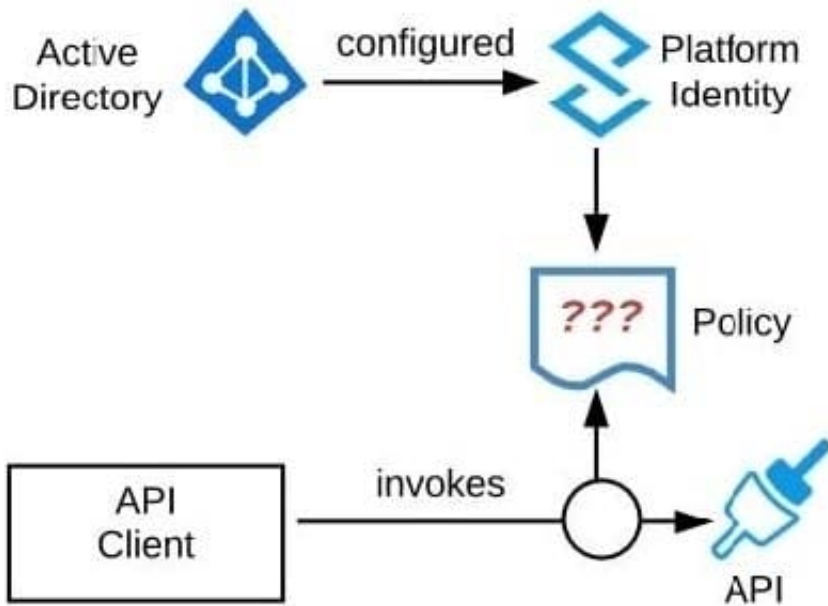

How can the application of a rate limiting API policy be accurately reflected in the RAML definition of an API?

- A. By refining the resource definitions by adding a description of the rate limiting policy behavior
- B. By refining the request definitions by adding a remainingRequests query parameter with description, type, and example
- C. y refining the response definitions by adding the out-of-the-box Anypoint Platform rate-limitemforcement securityScheme with description, type, and example
- D. By refining the response definitions by adding the x-ratelimit-* response headers with description, type, and example

Correct Answer: D

QUESTION 5

Refer to the exhibit.

An organization is running a Mule standalone runtime and has configured Active Directory as the Anypoint Platform external Identity Provider. The organization does not have budget for other system components.

What policy should be applied to all instances of APIs in the organization to most effectively restrict access to a specific group of internal users?

- A. Apply a basic authentication - LDAP policy; the internal Active Directory will be configured as the LDAP source for authenticating users.
- B. Apply a client ID enforcement policy; the specific group of users will configure their client applications to use their specific client credentials.
- C. Apply an IP whitelist policy; only the specific users' workstations will be in the whitelist.
- D. Apply an OAuth 2.0 access token enforcement policy; the internal Active Directory will be configured as the OAuth server.

Correct Answer: A
