QUESTION 1

Why is it necessary to indicate the placement of the proposed elevator and stairway in a preliminary plan?

- A. To ensure an acceptable location to meet all codes
- B. To verify the client's budget constraints
- C. To establish the structural support work required
- D. To ensure accessibility and visibility to visitors

Correct Answer: A

QUESTION 2

Which of the following scales should NEVER be used for interior design construction drawings?

- A. 1/8 in = 1 ft
- B. 3/16 in = 1 ft
- C. 3/4 in = 1 ft
- D. 1 in = 1 ft

Correct Answer: B

QUESTION 3

At the end of a commercial project, why should you require the HVAC system to be balanced?

- A. To verify that air quality levels are within the design specifications
- B. To detect significant air leaks in ductwork
- C. To adjust air flow at each device location to meet the criteria in the engineer's design
- D. To determine that each office is receiving the amount of outside air required by the design

Correct Answer: C

QUESTION 4

After construction on a project has begun, the client asks you to change the wallcovering originally specified to one that does not meet current code requirements.

Which of the following is your BEST course of action?

- A. Research available products that are similar to the requested product and meet the code requirements. Present the options to the client for approval.
- B. Write a letter to the client stating that the change is against your professional recommendation and that you will make the change but assume no liability.
- C. Write a letter to the client explaining that you will not make the requested change.
- D. Tell the client that you will remove the wallcovering from the project and that the client may select and install a different product after your work is completed.

Correct Answer: A

QUESTION 5

Your client has a very limited budget for design services, and the scope of the project warrants mechanical and electrical engineering specification.

What should you do?

- A. Reduce your scope to reduce the fee, and contract with a mechanical/electrical engineer for an outline specification.
- B. Recommend that the client work with a contractor to provide design-build services for mechanical/ electrical work.
- C. Request that the client contract directly with a mechanical/electrical engineer for limited services to review your drawings.
- D. Insist that your client increase the design budget to cover the necessary mechanical/electrical design services.

Correct Answer: B
