QUESTION 1

A client is 36 hours post-op a TKR surgery. 270 cc\\'s of sero-sanguinous accumulates in the surgical drains.

What action should the nurse take?

- A. Notify the doctor
- B. Empty the drain
- C. Do nothing
- D. Remove the drain

Correct Answer: A

The physician should be notified if excessive drainage is noted from the surgical site.

QUESTION 2

A nurse is caring for a retired MD. The MD asks the question, "What type of cells create exocrine secretions?"

The correct answer is _____.

- A. alpha cells
- B. beta cells
- C. acinar cells
- D. plasma cells

Correct Answer: C

Acinar cells create exocrine secretions.

QUESTION 3

Which atrioventricular heart block is also referred to as Mobitz II?

- A. Third-degree atrioventricular heart block.
- B. Second-degree atrioventricular heart block.
- C. First-degree atrioventricular heart block.
- D. Complete heart block.

Correct Answer: A

Third-degree atrioventricular heart block is also referred to as Mobitz II; this type of heart block occurs

when the AV node impulses are blocked as they try to reach the ventricles.

First degree heart block occurs when the AV node impulse is delayed.

Second degree heart block, as referred to as Mobitz I and Wenckebach, occurs when there are progressive conduction delays through the AV node that alters the PR and QRS intervals.

Complete heart block blocks all atrial impulses to the ventricle.

QUESTION 4

An allergic reaction is classified as what type of pharmacological effect?

- A. a side effect
- B. an adverse effect
- C. a therapeutic effect
- D. an incompatibility

Correct Answer: B

QUESTION 5

A client expresses anxiety about having magnetic resonance imaging performed.

Which of the following is an appropriate response by the nurse?

- A. "You can receive a sedative to help you relax during the test."
- B. "There is absolutely nothing to worry about."
- C. "There is no discomfort with this test, so don't be anxious."
- D. "The test won't last long, so you can handle it."

Correct Answer: A

This statement reassures the client that there is a solution for relief of his anxiety. The other responses minimize the client's feelings.
