---

### QUESTION 2

An administrator receives an alert email that indicates that a health check has failed. Which action should the administrator take to collect more information on the failed check?

- A. In the Prism Web Console, select the URL included in the check details
- B. Re-run the check from the CVM CLI using the ncc command
- C. Forward the alert email to Nutanix Support requesting more information
- D. Use the ncli command on the CVM to view the details of the check

Correct Answer: B

---

### QUESTION 3

Which component ensures uniform distribution of data throughout the cluster to eliminate hot spots and speed up rebuilds?

- A. Cassandra
- B. Distributed Storage Fabric
- C. High Availability
- D. Acropolis App Mobility Fabric

Correct Answer: B

---

#### QUESTION 4

AHV IPAM assigns an IP address from the address pool when creating a managed VM NIC. At which two instances does the address release back to the pool? (Choose two.)

- A. The VM is deleted
- B. The IP address lease expires
- C. The IP address is changed to static
- D. The VM NIC is deleted

Correct Answer: AD

An IP address is assigned from the pool of addresses when a managed VM NIC is created; the address is released back to the pool when the VM NIC or VM is deleted. Be sure to work with your network team to reserve a range of addresses for VMs before enabling the IPAM feature to avoid address overlap.

#### QUESTION 5

Which two capabilities does IPAM provide in a Nutanix networking configuration? (Choose two.)

- A. Allows proxy server settings to be set up for a defined network
- B. Allows AHV to assign IP addresses automatically to VMs using DHCP
- C. Configures a VLAN with an IP subnet and assigns a group of IP addresses
- D. Configures firewall rules to prevent or allow certain TCP/IP traffic

Correct Answer: BC
