QUESTION 1

Where should an administrator unregister Prism Element from Prism Central?

- A. From a Host SSH session
- B. From the Prism Central web console
- C. From the Prism Element web console
- D. From a CVM SSH session

Correct Answer: D

QUESTION 2

What does Nutanix recommend when setting up the node networking?

- A. Include NIC models from different vendors in the same bond
- B. Include at least two physically interfaces in every bond.
- C. Combine NIC models from different vendors in the same bond.
- D. Combine NIC models from different vendors in the same bond.

Correct Answer: B

QUESTION 3

An administrator wants to receive an environment summary report when a host failure occurs. Which action would address the administrator's need?

- A. Enable App Discovery
- B. Edit report schedule
- C. Configure an alert policy
- D. Create a playbook

Correct Answer: C

Explanation: An alert policy can be configured to send out an environment summary report when a host failure occurs. This can be done by creating a policy that triggers an alert whenever a host fails and then configuring the policy to send out a report that provides a summary of the environment in which the failure occurred. This will allow the administrator to quickly get a view of the environment after a failure occurs, allowing them to take the necessary steps to address the issue. https://www.nutanix.com/support-services/training-certification/certifications/certification-details-nutanix-certified-professional-multicloud-infrastructure-6_5

QUESTION 4

While installing Windows 2019 on a new VM on an AHV cluster, an administrator notices there aren't any drives listed for the install. What might the problem be?

- A. VirtIO drivers have not yet been installed and the disks are IDE disks.
- B. VirtIO drivers have not yet been installed and the disks are SCSI disks.
- C. VirtIO drivers must be installed on AHV for installations of Windows.
- D. VirtIO drivers aren't supported on this version of Windows 2019.

Correct Answer: B

QUESTION 5

A user running a Computer Aided Design (CAD) application is complaining about slow response time within the VM, particular when moving windows or rendering images. Which VM metric will guide the administrator toward diagnosing the problem?

- A. Storage Controller Latency
- B. GPU Usage
- C. Swap in Rate
- D. Hypervisor Memory Usage (%)

Correct Answer: B
