### QUESTION 1

Asystems administrator needs to add more VMs to their Nutanix cluster.

Which two actions should the administrator perform to determine if the current cluster can accommodate the new VMs? (Choose two.)

- A. Perform an Inventory with Life Cycle Management.
- B. Determine utilization with Cluster Runway.
- C. Enable Deduplication and Erasure Coding.
- D. Utilize Optimize Resources for VM efficiency.

Correct Answer: BD

---

### QUESTION 2

A consultant is setting up a new Hyper-V cluster. The customer requirements are as follows:

\*

VMs should automatically failover to another host if the host crashes

\*

Host CPU and Memory resources should be evenly balanced

\*

New VMs should be placed on the host with the most resources available Which two Hyper-V features can be used to meet the requirements? (Choose two.)

- A.  
Performance Resource Optimization
- B.  
Failover Clustering
- C.  
High Availability
- D.  
Distributed Resource Scheduler

Correct Answer: AB

---

### QUESTION 3

An administrator needs to expand a cluster based on AHV and running on Nutanix G5 hardware with a new Nutanix G7 system. The cluster is running AOS 5.10 but the operation fails when expanding the cluster. AOS is running on the new system. There are no issues discovering the node.

Why is the operation failing?

- A. AOS version running on G7 is older than the version on the cluster.
- B. Foundation software has not been updated on the cluster.
- C. G7 hardware cannot be added to a G5 cluster.
- D. EVC needs to be configured before cluster expansion

Correct Answer: A

---

### QUESTION 4

A customer has a primary datacenter with 12 Nutanix blocks distributed across three racks. The customer wants to achieve the most resiliency possible. They also have a datacenter in a branch office that is 400 kilometers away from the primary datacenter.

Which two solutions should be used? (Choose two.)

- A. Time Stream to a remote site
- B. Async DR to a remote site
- C. Rack awareness
- D. Block awareness

Correct Answer: BC

---

### QUESTION 5

A customer wants to know the details of network validation testing. Where can the consultant find this information?

- A. Handover checklist
- B. Test plan
- C. Operations Guides
- D. As-Built Guide

Correct Answer: A
