### QUESTION 1

When configuring Prism Central, which two log modules are able to forward messages to an external syslog server? (Choose two)

- A. API Audit
- B. Flow
- C. DNS
- D. NTP Synchronization

Correct Answer: AB

---

### QUESTION 2

A customer's database administrator is concerned about restoring data locality for their VMs after they migrate during an AHV upgrade. Which feature that addresses the issue should the systems engineer highlight? (Choose Two)

- A. All VM data is moved from the source to the destination node with the VM.
- B. AHV's built-in scheduler automatically restores data locality
- C. Mirroring the database on two VMs eliminates the need for data locality
- D. Shadow clones mitigate the need for data locality.

Correct Answer: AB

---

### QUESTION 3

Based on their current workload, a customer request the systems engineer to create a solution that does not exceed 80% CPU utilization when a node is placed in maintenance mode (N+0) When creating the Sizer Scenario in Automatic Mode, how can the systems engineer accomplish this?

- A. Customize the CPU threshold in the scenario's sizing options.
- B. Use Customize to increase the CPU Core count until the CPU utilization is 80%
- C. Select a higher-end processor when defining the workload.
- D. Modify the solution by adding compute only nodes to the cluster

Correct Answer: A

---

### QUESTION 4

A prospect is evaluating vSphere alternatives and has received FUD regarding AHV. The SE gives a demo and provides relevant case studies, but the prospect still requests a POC.

What additional option should the SE recommend to avoid a POC?

- A. Discounted Prism Pro
- B. X-Ray
- C. Nutanix Technology Bootcamp
- D. Xtract for VMs

Correct Answer: C

---

#### QUESTION 5

Which two Citrix desktop creation capabilities are supported on Nutanix AHV? (Choose two)

- A. Provisioning Service
- B. System Center Virtual Machine Manager
- C. Composer
- D. Machine Creation Services
- E. Desktop Delivery Controller

Correct Answer: AD
