QUESTION 1

If a cluster is in quorum, what is the minimum number of participating nodes that must be healthy?

- A. Two thirds
- B. Simple majority
- C. Three quarters
- D. Half

Correct Answer: B

QUESTION 2

Which snapmirror identifies backup vault relationship?

- A. SV
- B. DP
- C. BV
- D. LS
- E. XDP

Correct Answer: E

QUESTION 3

You notice your indirect I/O performance between nodes in your 4-node cluster is slowing down from prior week. Each node has two 10 GB connections to the cluster interconnect, one to each switch. You are using four out of 12 available ports on each cluster interconnect switch. Your cluster network utilization is over 80%.

What should you do to increase cluster interconnect performance?

- A. Change the SFP+ from 10 Gb to 16 Gb on each node and switch.
- B. Add two more cluster interconnect connections per node.
- C. Add additional ISLs between the two cluster interconnect switches.
- D. Change the cable from TwinAx to optical with SFP+ for better throughput.

Correct Answer: B

QUESTION 4

Which two Netapp tools perform pre-checks to determine whether a NAS environment meets the requirements for transitionin from 7-mode to clustered Data ONTAP? (Choose Two)

- A. 7-mode Transition Tool
- B. Clustered ONTAP transition Tool
- C. Migration Checklist
- D. Transition Advisor
- E. Transition Deck

Correct Answer: AD

(page 2)

QUESTION 5

Which two LIFs are able to failover or migrate to other nodes in the cluster? (Choose two.)

- A. cluster LIF
- B. data LIF of protocol CIFS
- C. data LIF of protocol FCoE
- D. data LIF of protocol iSCSI
- E. data LIF of protocol NFS
- F. intercluster LIF
- G. node management LIF

Correct Answer: BE
