QUESTION 1

A customer wants a FlexPod solution that is designed for high performance applications and that will support 32 Gbps Fibre Channel block storage.

In this scenario, which two components should you recommend to the customer? (Choose two.)

- A. NetApp AFF C190
- B. NetApp AFF A800
- C. Cisco Nexus 93180YC-FX
- D. Cisco Nexus 9504

Correct Answer: BC

QUESTION 2

A customer wants a low latency and high IOPS FlexPod solution and decides on an end-to-end NVMe design.

In this scenario, which three components are required to accomplish this task? (Choose three.)

- A. NetApp FAS with a 32Gbps FC HBA
- B. Cisco Application Policy Infrastructure Controller (APIC)
- C. Cisco MDS Series switches
- D. NetApp AFF with a 32Gbps FC HBA
- E. Cisco UCS Virtual Interface Card (VIC) 1400 series

Correct Answer: CDE

QUESTION 3

Click the Exhibit button.

You are building a new FlexPod system booting from SAN.

Referring to the exhibit, how many paths will there be to the target LUN?

- A. 1
- B. 2
- C. 8
- D. 4

Correct Answer: D

QUESTION 4

A customer deployed a FlexPod Datacenter solution six months ago that included Cisco UCS 6332 Fabric Interconnects with the default port license enabled. They will be performing an upgrade to the system which requires a reboot of the Fabric Interconnects (FI) and they want to ensure that the servers are available after the reboot.

In this scenario, how many ports on the FI will be active after the reboot?

- A. 16 ports
- B. 4 ports
- C. 8 ports
- D. 32 ports

Correct Answer: A

QUESTION 5

You are asked to ensure link redundancy to your hosts using Virtual Port Channel (vPC). You are creating a vPC on a pair of Cisco Nexus switches.

In this scenario, which two steps are required to accomplish this task? (Choose two.)

- A. Set all vPC ports to switchport mode access
- B. Configure the vPC peer keep-alive link
- C. Create a vPC domain
- D. Configure system priority

Correct Answer: BC
