QUESTION 3

You are installing a new FAS2750 cluster with 24 HDDs for a customer to run a NAS workload. The customer requests that the HA pair have only a single aggregate that is located on Node 1. Maximum capacity is required.

Which action must be performed to ensure that the customer's requests are satisfied?

- A. Perform a takeover of Node 2 to ensure that it does not run.
- B. Assign all data LIFs to Node 1.
- C. Assign all the partitioned disks from Node 2 to Node 1, and create a single aggregate.

D. Assign all the data partitions from Node 2 to Node 1, and create a single aggregate.

Correct Answer: B

QUESTION 4

In an ONTAP switched cluster, which three types of traffic travels over the cluster network? (Choose three.)

- A. intercluster SnapMirror
- B. intracluster SnapMirror
- C. Epsilon voting
- D. cluster database replication
- E. remote cluster peering

Correct Answer: ADE

QUESTION 5

You use the system health subsystem show command to troubleshoot your newly installed ONTAP cluster.

In this scenario, which two health outputs would this command show you? (Choose two.)

- A. data switch cabling
- B. cluster switch cabling
- C. shelf connectivity
- D. node CPU utilization

Correct Answer: CD
