QUESTION 1

You are installing a new AFF A400 cluster for a customer. The customer indicates that they want to take advantage of AutoSupport On Demand.

In this scenario, which AutoSupport transport protocol must you use?

- A. HTTP
- B. SMTP
- C. FTP
- D. HTTPS

Correct Answer: D

Reference: <https://www.netapp.com/media/10438-tr-4444.pdf> (9)

QUESTION 2

One of the nodes in your ONTAP 9.7 cluster has failed and is not coming back online.

Which two methods would you use to connect to the node failing to come back online? (Choose two.)

- A. Use the Intelligent Platform Management Interface.
- B. Use the Service Processor Interface.
- C. Use Secure Shell.
- D. Use Telnet.

Correct Answer: BC

QUESTION 3

Click the Exhibit button.

```
::> event notification destination create -name syslog -syslog 10.10.100.40  
::> event notification create -filter-name important-events -destinations syslog  
::> cluster log-forwarding create -destination 10.10.100.40 -port 514 -facility user
```

Referring to the exhibit, what information is forwarded to syslog after you enter the scripted install commands? (Choose two.)

- A. command history
- B. EMS messages

C. AutoSupport messages

D. SNMP traps

Correct Answer: AC

QUESTION 5

A customer has a current AFF ASA A700 cluster and they want to expand the cluster by adding a second AFF ASA A700 HA pair.

In this scenario, which step would be required to accomplish this task?

A. Install a BES-53248 cluster switch and convert the AFF ASA A700 from a switchless to switch cluster.

B. Enable ALUA between the two HA pairs to allow cluster backend traffic.

C. The customer will need to create a separate cluster for the second AFF ASA A700 pair.

D. Install a Brocade FC switch and create zoning between the original cluster and the new cluster.

Correct Answer: A
