-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

After a storage administrator turned off IP fast path, all the NFS clients lost connectivity to the storage controller. Which statement describes what happened in this scenario?

- A. The NFS clients are using NFS over UDP.
- B. All clients are in the local broadcast domain.
- C. The ARP cache is flushed when IP fast path disabled.
- D. No default gateway is configured.

Correct Answer: A

QUESTION 2

Your customer has a 2-node cluster with two FAS2554 controllers running clustered Data ONTAP 8.3. You want to upgrade non-disruptively to clustered Data ONTAP 8.3.1 using the rolling-upgrade method. Which two operations would you perform before issuing the `~storage failover takeover - ofnode NodeA~` command? (Choose two.)

- A. Upgrade the service processor of all nodes.
- B. Migrate all LIFs used for iSCSI and FC away from NodeA.
- C. Change the default boot image to the new image.
- D. Install the new software image on all nodes.

Correct Answer: BC

QUESTION 3

A customer has one storage virtual machine (SVM) that is using Fibre Channel as a protocol (FCP). Some clients are successfully accessing LUNs on this SVM. The zoning is done by using worldwide port names (WWPNs). The customer creates a second SVM for Fibre Channel and wants to access new LUNs in this SVM from the same clients.

Which three statements are true in this scenario? (Choose three.)

- A. The initiator groups (igroups) from the first SVM are also working for the second SVM.
- B. Fibre Channel zoning must be reconfigured for the new SVM.
- C. FCP must be enabled on the second SVM.
- D. Fibre Channel zoning does not need to be changed if the second SVM uses the same ports as the first SVM.
- E. You must map the new LUNs in the second SVM to the correct initiator group (igroup).

Correct Answer: ABC

QUESTION 4

You have a 6-node cluster with six identical controllers. You are upgrading from clustered Data ONTAP 8.3.1 to clustered Data ONTAP 8.3.2. From the Upgrade Advisor, you downloaded the upgrade plan. In this scenario, which two steps are part of that plan? (Choose two.)

- A. Set a new image as the default image.
- B. Verify system health.
- C. Migrate all aggregates to the HA pair that was most recently upgraded.
- D. Perform LIF migration of all SAN LIFs before takeover.

Correct Answer: AD

QUESTION 5

Click the Exhibit tab.

```
cluster::> cifs share show -vserver SVM1 -share-name test9

Vserver: SVM1
Share: test9
CIFS Server NetBIOS Name: SVM1
Path: /test9
Share Properties: oplocks
browsable
changenotify
Symlink Properties: symlinks
File Mode Creation Mask: -
Directory Mode Creation Mask: -
Share Comment: -
Share ACL: Everyone / No access
domainA\companyusers / Full Control
domainA\interngroup / No access
domainA\temps / Read
File Attribute Cache Lifetime: -
Volume Name: vol9
Offline Files: manual
Vscan File-Operations Profile: standard
Maximum Tree Connections on Share: 4294967295
UNIX Group for File Create: -
```

A storage administrator tells you that a company security mandate was applied to remove all CIFS share level permissions of everyone - full control. Now users are unable to access CIFS shares.

The storage virtual machine (SVM) is named "SVM1" on clustered Data ONTAP 8.3.1. The storage administrator wants to know what can be done to restore full control access to users that are receiving "access denied" errors. The storage

administrator has provided you with the vserver cifs share show command output of one of the CIFS shares with issues as shown in the exhibit.

Which two steps must you perform to solve the problem? (Choose two.)

- A. Execute the : : >vserver cifs share access-control delete -vserver SVM1 -share test9 - user-or-group Everyonecommand from the controller.
- B. Execute the : : >vserver cifs share access-control delete -vserver SVM1 -share test9 - user-or-group domain\interngroupcommand from the controller.
- C. Ensure that, in Active Directory, the desiredusers are members of thedomainA\tempsgroup.
- D. Ensure that, in Active Directory, the desired users are members of thedomainA\companyusersgroup.

Correct Answer: BD
