QUESTION 1

You have an NFS export in Cloud Volumes Service, but have an application requirement for block access and SCSI-2 reservations. You need to migrate the data to a new iSCSI LUN presented to a Linux server from Cloud Volumes ONTAP. The Linux server is also running an NFS server.

In this scenario, which tool would you use to perform this task?

- A. Cloud Sync
- B. SnapMirror
- C. Robocopy
- D. CloudMirror

Correct Answer: A

QUESTION 2

Which two advanced SMB features are available with Cloud Volumes ONTAP 9.5? (Choose two.)

- A. credit limits
- B. workgroup authentication
- C. large MTU
- D. multichannel

Correct Answer: C

QUESTION 3

You deployed Cloud Volumes ONTAP BYOL with an aggregate that has a single 8 TB disk. You start copying 12 TB of data to the instance- However, the data copy fails, and an out-of-space message is displayed.

In this scenario, which statement is correct?

- A. The Aggregate Free Space Ratio for Data Tiering is set to 25%.
- B. The Capacity Management Mode is set to Manual.
- C. The Aggregate Free Space Ratio is set to 5%.
- D. The Capacity Management Mode is set to Automatic.

Correct Answer: A

QUESTION 4

When configuring adaptive QoS, which two statements are true? (Choose two.)

- A. A storage object can be a member of an adaptive policy group or a non-adaptive policy group, but not both.
- B. Adaptive QoS policy groups are always not shared.
- C. Adaptive QoS policy groups are always shared.
- D. The ratio of throughput limits to storage object size is determined exclusively by setting expected-iops.

Correct Answer: CD

QUESTION 5

You created a volume with Cloud Volumes Service for AWS for an analytics application. The application using the volume requires maximum performance. You have set the service level to "extreme". All the analysis takes place between 9:00A.m. and 5:00 p.m.

In this scenario, how would you optimize storage cost?

- A. Reduce the capacity of the volume.
- B. Use the built-in sync service to move the volume to another region with lower cost storage.
- C. Create a new volume with a lower service level.
- D. Use the API to lower the service level of the volume during off-peak hours.

Correct Answer: A
