-  **800,000+** Satisfied Customers

QUESTION 1

You are designing a new hybrid cloud solution. The nonfunctional requirements state that you must be able to integrate identity management for SSO authentication.

In this scenario, what are two supported identity management providers? (Choose two.)

- A. OAuth
- B. SAML
- C. YAML
- D. Azure Active Directory

Correct Answer: AB

QUESTION 2

You want to manage access to your hybrid cloud resources centrally. You want to use single sign-on (SSO) to access your NetApp Cloud Central accounts using credentials from your corporate directory. Which two open standards would you use to federate your identity to the company's SSO? (Choose two.)

- A. Security Assertion Markup Language 2.0 (SAML)
- B. Windows Active Directory (AD) authentication protocols
- C. Lightweight Directory Access Protocol (LDAP)
- D. OpenID Connect (OIDC)

Correct Answer: BC

QUESTION 3

You are migrating your on-premises Microsoft SQL Server to Microsoft Azure VMs and Azure NetApp Files. You want to avoid connectivity interruptions during scheduled maintenance operations.

Which Azure NetApp Files feature satisfies this requirement?

- A. Manual QoS Capacity Pool
- B. Azure Application Consistent Snapshot Tool (AzAcSnap)
- C. Snapshot Revert
- D. SMB Continuously Available shares

Correct Answer: B

QUESTION 4

Exhibit.

Application-Aligned Storage Service Levels			
Service Level Policy	Value	Performance/Performance prime	Extreme/Extreme Performance Prime
Workload Type	Email, web, file shares, backup	Database and virtualized applications	Latency-sensitive applications
Minimum "SLA" (IOPS/TB allocated)	128	2048	6144
Maximum "SLO" (QoS Limit in IOPS/TB Stored)	512	4096	12288
Latency (ms)	17	2	1
Flash-Accelerated, SAN and NAS, Non-Stop Availability and Durability, Non-Disruptive Movement			

You are implementing storage-as-a-service using the service levels that are shown in the exhibit. In your implementation plan, which metric is used for the SLA and SLO?

- A. throughput
- B. I/O density
- C. latency
- D. RAID level

Correct Answer: B

QUESTION 5

You are planning a migration of a single 500 TB workload into NetApp Cloud Volumes ONTAP starting with 10 TB and gradually increasing the amount hosted in the cloud. You believe that 80% of the data is cold and will be tiered using data tiering. The most important factor is to minimize the number of licenses as your footprint grows.

Which two licensing options would minimize the cost of the licenses in this scenario? (Choose two.)

- A. Purchase a PAYGO license from the cloud marketplace for the initial footprint, and then use in-place conversion to a BYOL license.
- B. Purchase a PAYGO license from the cloud marketplace for the initial footprint, and allow it to grow as your Cloud Volumes ONTAP instance grows.
- C. Purchase a BYOL license for the initial footprint, and then stack additional BYOL licenses when you reach capacity on the initial license.
- D. Purchase a single BYOL Cloud Volumes ONTAP license for the Initial footprint, and then deploy a new Cloud Volumes ONTAP instance for each additional migration.

Correct Answer: BC
