QUESTION 1

An administrator would like to create an SD-WAN using central management. What steps does the administrator need to perform to create an SD-WAN using central management?

- A. First create an SD-WAN firewall policy, add member interfaces to the SD-WAN template and create a static route
- B. You must specify a gateway address when you create a default static route
- C. Remove all the interface references such as routes or policies
- D. Enable SD-WAN central management in the ADOM, add member interfaces, create a static route and SD-WAN firewall policies.

Correct Answer: D

QUESTION 2

Which of the following conditions trigger FortiManager to create a new revision history? (Choose two.)

- A. When configuration revision is reverted to previous revision in the revision history
- B. When FortiManager installs device-level changes to a managed device
- C. When FortiManager is auto-updated with configuration changes made directly on a managed device
- D. When changes to device-level database is made on FortiManager

Correct Answer: CD

QUESTION 3

Which of the following statements are true regarding SD-WAN Central Management? (Choose three.)

- A. SD-WAN must be enabled on per-ADOM basis
- B. SD-WAN settings can be installed on multiple FortiGate devices at the same time
- C. You can create multiple SD-WAN interfaces per VDOM
- D. When you configure an SD-WAN, you must specify at least two member interfaces.
- E. The first step in creating an SD-WAN using FortiManager is to create two SD-WAN firewall policies.

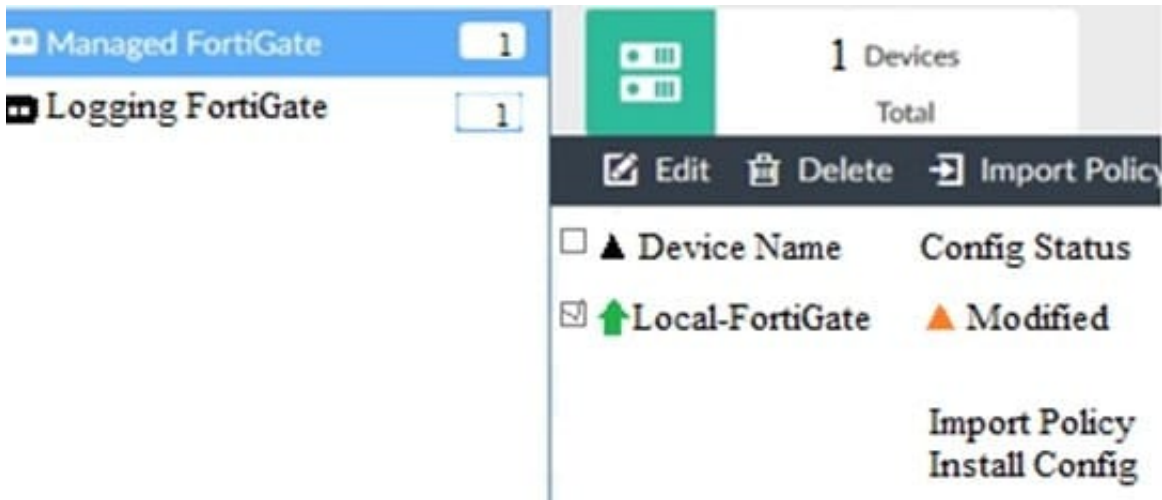

Correct Answer: BCD

QUESTION 4

View the following exhibit.

When using Install Config option to install configuration changes to managed FortiGate, which of the following statements are true? (Choose two.)

- A. Once initiated, the install process cannot be canceled and changes will be installed on the managed device
- B. Will not create new revision in the revision history
- C. Installs device-level changes to FortiGate without launching the Install Wizard
- D. Provides the option to preview configuration changes prior to installing them

Correct Answer: AC

QUESTION 5

What does a policy package status of Modified indicate?

- A. FortiManager is unable to determine the policy package status
- B. The policy package was never imported after a device was registered on FortiManager
- C. Policy configuration has been changed on a managed device and changes have not yet been imported into FortiManager
- D. Policy package configuration has been changed on FortiManager and changes have not yet been installed on the managed device.

Correct Answer: D
