QUESTION 3

Refer to the exhibit.

Start to import config from device(Local-FortiGate) vdom(root) to adom(My_ADOM), package(Local-FortiGate_root)

"firewall service category",SKIPPED,"(name=General, oid=697, DUPLICATE)"

"firewall address",SUCCESS,"(name=LOCAL_SUBNET, oid=684, new object)"

"firewall service custom",SUCCESS,"(name=ALL, oid=863, update previous object)"

"firewall policy",SUCCESS,"(name=1, oid=1090, new object)"

Given the configuration shown in the exhibit, how did FortiManager handle the service category named General?

A. FortiManager ignored the firewall service category General but created a new service category in its database.

B. FortiManager ignored the firewall service category general and deleted the duplicate value In Its database

C. FortiManager ignored the firewall service category General and updated the FortiGate duplicate value in the FortiGate database.

D. FortiManager ignored the firewall service category General and did not update Its database with the value

Correct Answer: C

QUESTION 4

An administrator has assigned a global policy package to a new ADOM called ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

A. When creating a new policy package, the administrator can select the option to assign the global policy package to the new policy package

B. When a new policy package is created, the administrator needs to reapply the global policy package to ADOM1.

C. When a new policy package is created, the administrator must assign the global policy package from the global ADOM.

D. When the new policy package is created, FortiManager automatically assigns the global policy package to the new policy package.

Correct Answer: D
