### QUESTION 2

An organization has different groups of users with different needs in email functionality, such as address book access, mobile device access, email retention periods, and disk quotas.

Which FortiMail feature specific to server mode can be used to accomplish this?

- A. Resource profiles
- B. Domain-level service settings
- C. Access profiles
- D. Address book management options

Correct Answer: C

### QUESTION 3

A FortiMail administrator is investigating a sudden increase in DSNs being delivered to the protected domain for undeliverable email messages. After searching the logs, the administrator identifies that the DSNs were not generated

as a result of any outbound email sent from the protected domain.

Which FortiMail antispam technique can the administrator use to prevent this scenario?

- A. Spam outbreak protection
- B. Bounce address tag validation
- C. Spoofed header detection
- D. FortiGuard IP Reputation

Correct Answer: A
