Phone type: FortiFone-SoftClient
Phone profile: Admin defined
 Default-FortiFone-SoftClient
 User defined
[Auxiliary device...]

An administrator has configured FortiVoice Advanced Setting for a user as shown in the exhibit.

Given this configuration, which statement is true?

- A. The extension can be reached at 3761 when user is remote.
- B. FortiVoice is configured behind a NAT device.
- C. The user extension is currently disabled.

D. The user extension is configured for SoftClient use.

Correct Answer: D

QUESTION 2

When High Availability is configured and the heartbeat link is lost between FortiVoice units, what will happen?

- A. The slave unit takes over as the master unit.
- B. The master unit beeps loudly to indicate an error.
- C. The master unit defaults the configuration.
- D. The slave unit sends calls to voicemail until the master unit has been rebooted.

Correct Answer: A

QUESTION 3

Which statement correctly describes the configuration of a survivable branch system when set to fully managed?

- A. The central system configures the device, excluding network settings.
- B. The central system configures the device, excluding VoIP profile settings.
- C. The central system configures the full configuration for the system.
- D. The central system configures the device, excluding network settings, and administrator settings.

Correct Answer: C

QUESTION 4

An administrator is configuring a new FortiVoice system and is having trouble with outbound and external inbound calls. The network administrator has verified that Internet connectivity is stable and the FortiVoice system can reach the Internet. Local extension calls are also working without any issue.

Which two configurations are likely causing this issue? (Choose two.)

- A. Office Peers
- B. DID mapping
- C. VoIP Trunk
- D. Inbound call routing

Correct Answer: AB

QUESTION 5

What is the flow of SIP messages when an IP extension places an outbound call under normal operation?

- A. SIP messages go to the gateway directly before routing out of the trunk.
- B. SIP messages go to the branch system then to the central system before routing out the trunk.
- C. SIP messages go to the central system directly before routing out of the trunk.
- D. SIP messages go directly out to the trunk.

Correct Answer: A
