QUESTION 1

What is one of the key benefits of the FortiGuard IP reputation feature?

- A. It maintains a list of private IP addresses.
- B. It provides a document of IP addresses that are suspect, so that administrators can manually update their blacklists.
- C. It is updated once per year.
- D. It maintains a list of public IPs with a bad reputation for participating in attacks.

Correct Answer: D

FortiGuard IP Reputation service assigns a poor reputation, including virus-infected clients and malicious spiders/crawlers. Reference: <https://docs.fortinet.com/document/fortiweb/6.1.1/administration-guide/137271/blacklisting-whitelisting-clients>

QUESTION 2

What must you do with your FortiWeb logs to ensure PCI DSS compliance?

- A. Store in an off-site location
- B. Erase them every two weeks
- C. Enable masking of sensitive data
- D. Compress them into a .zip file format

Correct Answer: C

Reference: <https://docplayer.net/8466775-Fortiweb-web-application-firewall-ensuring-compliance-for-pci-dss-requirement-6-6-solution-guide.html>

QUESTION 3

In which scenario might you want to use the compression feature on FortiWeb?

- A. When you are serving many corporate road warriors using 4G tablets and phones
- B. When you are offering a music streaming service
- C. When you want to reduce buffering of video streams
- D. Never, since most traffic today is already highly compressed

Correct Answer: A

<https://training.fortinet.com/course/view.php?id=3363> When might you want to use the compression feature on FortiWeb? When you are serving many road warriors who are using 4G tablets and phones

QUESTION 4

You are using HTTP content routing on FortiWeb. Requests for web app A should be forwarded to a cluster of web servers which all host the same web app. Requests for web app B should be forwarded to a different, single web server.

Which is true about the solution?

- A. Static or policy-based routes are not required.
- B. To achieve HTTP content routing, you must chain policies: the first policy accepts all traffic, and forwards requests for web app A to the virtual server for policy A. It also forwards requests for web app B to the virtual server for policy B. Policy A and Policy B apply their app-specific protection profiles, and then distribute that app's traffic among all members of the server farm.
- C. You must put the single web server into a server pool in order to use it with HTTP content routing.
- D. The server policy applies the same protection profile to all its protected web apps.

Correct Answer: B

QUESTION 5

What role does FortiWeb play in ensuring PCI DSS compliance?

- A. It provides the ability to securely process cash transactions.
- B. It provides the required SQL server protection.
- C. It provides the WAF required by PCI.
- D. It provides credit card processing capabilities.

Correct Answer: C
