### QUESTION 1

Which two statements about running a vulnerability scan are true? (Choose two.)

- A. You should run the vulnerability scan during a maintenance window.
- B. You should run the vulnerability scan in a test environment.
- C. Vulnerability scanning increases the load on FortiWeb, so it should be avoided.
- D. You should run the vulnerability scan on a live website to get accurate results.

Correct Answer: AB

Should the Vulnerability Scanner allow it, SVMS will set the scan schedule (or schedules) to run in a maintenance window. SVMS will advise Client of the scanner's ability to complete the scan(s) within the maintenance window. Vulnerabilities on live web sites. Instead, duplicate the web site and its database in a test environment.

---

#### QUESTION 4

What capability can FortiWeb add to your Web App that your Web App may or may not already have?

- A. Automatic backup and recovery
- B. High Availability
- C. HTTP/HTML Form Authentication
- D. SSL Inspection

Correct Answer: C

---

#### QUESTION 5

You are using HTTP content routing on FortiWeb. You want requests for web application A to be forwarded to a cluster of web servers, which all host the same web application. You want requests for web application B to be forwarded to a different, single web server.

Which statement about this solution is true?

- A. The server policy applies the same protection profile to all of its protected web applications.
- B. You must put the single web server in to a server pool, in order to use it with HTTP content routing.
- C. You must chain policies so that requests for web application A go to the virtual server for policy A, and requests for web application B go to the virtual server for policy B.
- D. Static or policy-based routes are not required.

Correct Answer: D
