#### QUESTION 1

In an SP-initiated SAML 2.0 flow, the SP will never redirect to Okta if the session is already active

Solution: It will always redirect to Okta and in this case only - will prompt the user for re- authentication by manually entering Okta credentials

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 2

As an Okta admin, when you implement IWA, you have to know how to successfully test it to see if it's working. For this you:

Solution: Paste into a browser configured for DSSO the IWA redirect URL along with `/authenticated.aspx` after it, hit `Enter` and check the message returned

A. Yes

B. No

Correct Answer: A

---

#### QUESTION 3

When you call a GET API call for users / groups / and other such objects, the response is usually Paginated, in case these are a lot of objects returned. What do you do in order to retrieve all objects?

Solution: You call the very same API with the help of a different token, hence will return the next page of objects

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 4

Regarding policies, Okta recommends:

Solution: To include a policy rule that catches not wanted behaviors as a first priority and then label others for permitted behaviors

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 5

With agentless DSSO (Desktop Single Sign-on), you still have a need of deploying IWA Agents in your Active Directory domains to implement DSSO functionality.

Solution: The statement is true, as agentless DSSO means no AD agents, not no IWA agents

A. Yes

B. No

Correct Answer: B
