### QUESTION 1

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee?

Solution: Deprovisioning task

A. Yes

B. No

Correct Answer: A

Explanation: Employee leaves an organization As employees leave an organization, a process can be initiated by various departments to deactivate users. The user account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data. You can deprovision users in Okta or from an external user store, such as AD or a CRM app, such as Salesforce. Typically, user deactivation is triggered from an external user store and it flows into Okta. In any case, deactivated users are automatically deprovisioned from supported apps. Admins receive an email describing any apps that require them to manually deprovision from users. <https://help.okta.com/en/prod/Content/Topics/Provisioning/lcm/lcm-lifecycle-event-triggers.htm>

---

### QUESTION 2

Is this a valid reason to choose Okta as an Identity and Access Management (IAM) solution?

Solution: To manage traffic between on-premise applications.

A. Yes

B. No

Correct Answer: B

### QUESTION 3

Is this a true statement about a General Availability (GA) feature?

Solution: It is available to all eligible customers.

A. Yes

B. No

Correct Answer: A

Explanation: <https://developer.okta.com/docs/reference/releases-at-okta/> A feature in General Availability (GA) is new or enhanced functionality that is enabled by default for all customers. Beginning in February 2017, features move from EA (enabled by request) to GA (enabled for all orgs) in a regular cadence:

EA features become GA in preview orgs in the first release of the month. These same features become GA in production orgs in the first release of the next month.

Features in GA are supported by Okta Customer Support, and issues are addressed according to your Customer Agreement with Okta.

Documentation for features in GA release are not marked with any icons.

#### QUESTION 4

Is this the provisioning feature that an Okta Administrator uses to ensure end user accounts are automatically created upon first login?

Solution: Just-in-Time (JIT) provisioning

A. Yes

B. No

Correct Answer: A

---

#### QUESTION 5

Is this an Okta setting an end user can change? Solution: Security Image

A. Yes

B. No

Correct Answer: B
