QUESTION 1

What is the holding queue for messages that cannot be delivered to the destination queues?

- A. Dead-letter queue
- B. Backout queue
- C. Transmission queue
- D. Undeliverable messages are simply discarded from the system

Correct Answer: A

QUESTION 2

In order for a MQ program to send a message to another MQ program using a queue, which of the following is true?

- A. The sending program must request the receiving program's queue name from the WebSphere MQ queue manager.
- B. The sending program, the receiving program, and WebSphere MQ must all be currently running before any of the queues can be accessed.
- C. The sending program and the receiving program must agree on which queue they will use for communicating.
- D. The sending program specifies the receiver program name in a message header by which WebSphere MQ uses to send the message to the receiver program.

Correct Answer: C

QUESTION 3

Which of the following is NOT required for a WebSphere MQ Client program?

- A. A WebSphere MQ client programming API
- B. A synchronous connection to the queue manager
- C. Queue Manager run-time code on machine where client is running
- D. A destination on a queue manager by which to put or get messages

Correct Answer: D

QUESTION 4
