QUESTION 1

In order for a MQ program to send a message to another MQ program using a queue, which of the following is true?

A. The sending program must request the receiving program\\'s queue name from the WebSphere MQ queue manager.

B. The sending program, the receiving program, and WebSphere MQ must all be currently running before any of the queues can be accessed.

C. The sending program and the receiving program must agree on which queue they will use for communicating.

D. The sending program specifies the receiver program name in a message header by which WebSphere MQ uses to send the message to the receiver program.

Correct Answer: C

QUESTION 2

If a .NET program using WebSphere MQ wishes to communicate with a Java program using WebSphere MQ, which of the following is NOT true?

A. The Java program can use the WebSphere MQ classes for Java.

B. The .NET program can use the WebSphere MQ classes for .NET.

C. The Java program can use the WebSphere MQ classes for JMS.

D. The .NET program can use the WebSphere MQ classes for NMS.

Correct Answer: D

QUESTION 3

If the solution designer wishes to ensure that subscribing MQ applications receive message from a topic even if the subscribing MQ application is disconnected from the queue manager at the time the message is published, which action is required?

A. The publishing application must set the message as persistent.

B. The subscribing application must set the message as persistent.

C. The publishing application must set the subscription as durable.

D. The subscribing application must set the subscription as durable.

Correct Answer: D

QUESTION 4
