-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

What are two key characteristics of a Type 1 hypervisor? (Choose two.)

- A. is hardened against cyber attacks
- B. runs without any vulnerability issues
- C. runs within an operating system
- D. allows multiple, virtual (or guest) operating systems to run concurrently on a single physical host computer

Correct Answer: CD

QUESTION 2

Which item accurately describes a security weakness that is caused by implementing a "ports first" data security solution in a traditional data center?

- A. You may have to use port numbers greater than 1024 for your business-critical applications.
- B. You may have to open up multiple ports and these ports could also be used to gain unauthorized entry into your datacenter.
- C. You may not be able to assign the correct port to your business-critical applications.
- D. You may not be able to open up enough ports for your business-critical applications which will increase the attack surface area.

Correct Answer: B

QUESTION 3

Which Palo Alto subscription service identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs) through static and dynamic analysis in a scalable, virtual environment?

- A. DNS Security
- B. URL Filtering
- C. WildFire
- D. Threat Prevention

Correct Answer: C

"The WildFire cloud-based malware analysis environment is a cyber threat prevention service that identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs) through static and dynamic analysis in a scalable, virtual environment. WildFire automatically disseminates updated protections in near-real time to immediately prevent threats from spreading; this occurs without manual intervention"

QUESTION 4

Which term describes data packets that move in and out of the virtualized environment from the host network or a corresponding traditional data center?

- A. North-South traffic
- B. Intrazone traffic
- C. East-West traffic D. Interzone traffic

Correct Answer: A

QUESTION 5

In addition to integrating the network and endpoint components, what other component does Cortex integrate to speed up IoC investigations?

- A. Computer
- B. Switch
- C. Infrastructure
- D. Cloud

Correct Answer: D

Cortex XDR breaks the silos of traditional detection and response by natively integrating network, endpoint, and cloud data to stop sophisticated attacks
