QUESTION 1

The development team wants to fail CI jobs where a specific CVE is contained within the image. How should the development team Configure the pipeline or policy to produce this outcome?

- A. Set the specific CVE exception as an option in Jenkins or twistcli.
- B. Set the specific CVE exception as an option in Defender running the scan.
- C. Set the specific CVE exception as an option using the magic string in the Console.
- D. Set the specific CVE exception in Console\\'s CI policy.

Correct Answer: D

QUESTION 2

What improves product operationalization by adding visibility into feature utilization and missed opportunities?

- A. Alert Center
- B. Alarm Center
- C. Alarm Advisor
- D. Adoption Advisor

Correct Answer: D

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/manage-prisma-cloud-administrators/adoption-advisor>

QUESTION 3

Review this admission control policy:

```
match[{"msg": msg}] {  
  input.request.operation == "CREATE"  
  input.request.kind.kind == "Pod"  
  input.request.resource.resource == "pods"  
  input.request.object.spec.containers[_].securityContext.privileged msg := "Privileged" }
```

Which response to this policy will be achieved when the effect is set to `block`?

- A. The policy will block all pods on a Privileged host.

- B. The policy will replace Defender with a privileged Defender.
- C. The policy will alert only the administrator when a privileged pod is created.
- D. The policy will block the creation of a privileged pod.

Correct Answer: D

The question is mentioning about if the effect is set to "block"

Which response to this policy will be achieved when the effect is set to `block`?

Prevent will only terminates related process in container, otherwise block will block the resource creation.

Answer is D

QUESTION 4
