QUESTION 1

An administrator is trying to implement an exception to an external dynamic list manually. Some entries are shown underlined in red.

What would cause this error?

A. Entries contain symbols.

B. Entries are wildcards.

C. Entries contain regular expressions.

D. Entries are duplicated.

Correct Answer: D

You cannot save your changes to the external dynamic list if you have duplicate entries in the Manual Exceptions list. To identify duplicate entries, look for entries with a red underline.

QUESTION 2

You need to allow users to access the office-suite application of their choice. How should you configure the firewall to allow access to any office-suite application?

A. Create an Application Group and add Office 365, Evernote Google Docs and Libre Office

B. Create an Application Group and add business-systems to it.

C. Create an Application Filter and name it Office Programs, then filter it on the office programs subcategory.

D. Create an Application Filter and name it Office Programs then filter on the business- systems category.

Correct Answer: C

QUESTION 3

What do application filters help provide access to?

A. Applications that are explicitly sanctioned for use within a company

B. Applications that are not explicitly sanctioned and that a company wants users to be able to access

C. Applications that are explicitly unsanctioned for use within a company

D. Applications that are not explicitly unsanctioned and that a company wants users to be able to access

Correct Answer: B

QUESTION 4

URL categories can be used as match criteria on which two policy types? (Choose two.)
