-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Review the screenshot below. Based on the information it contains, which protocol decoder will detect a machine-learning match, create a Threat log entry, and permit the traffic?

The screenshot shows the 'Antivirus Profile (Read Only)' configuration page. The 'Name' field is 'withvirus-alert' and the 'Description' field is empty. The 'Action' tab is selected, showing options for 'Signature Exceptions' and 'WildFire Inline ML'. The 'Enable Packet Capture' checkbox is unchecked. The 'Decoders' section contains a table with the following data:

| PROTOCOL | SIGNATURE ACTION | WILDFIRE SIGNATURE ACTION | WILDFIRE INLINE ML ACTION |
|----------|----------------------|---------------------------|---------------------------|
| ftp | default (reset-both) | alert | default (reset-both) |
| http | alert | alert | alert |
| http2 | allow | allow | allow |
| imap | default (alert) | alert | default (alert) |
| pop3 | default (alert) | alert | default (alert) |
| smb | default (reset-both) | alert | default (reset-both) |
| smtp | default (alert) | alert | default (alert) |

The 'Application Exceptions' section is empty, showing a search bar and '0 items'.

- A. smb
- B. imap
- C. ftp
- D. http2

Correct Answer: B

HTTP/2 has allow which does not create a log-entry

QUESTION 2

A network administrator is required to use a dynamic routing protocol for network connectivity.

Which three dynamic routing protocols are supported by the NGFW Virtual Router for this purpose? (Choose three.)

- A. RIP
- B. OSPF
- C. IS-IS
- D. EIGRP
- E. BGP

Correct Answer: ABE

QUESTION 3

Which two statements apply to an Advanced Threat Prevention subscription? (Choose two.)

- A. It contains all the features already in a Threat Prevention subscription.
- B. It provides the ability to identify evasive and previously unseen command-and-control (C2) threats.
- C. When it is active, a WildFire profile is no longer needed.
- D. Due to its more advanced signatures, it provides the ability to identify new threats.

Correct Answer: AB

QUESTION 4

What is the main function of Policy Optimizer?

- A. reduce load on the management plane by highlighting combinable security rules
- B. migrate other firewall vendors' security rules to Palo Alto Networks configuration
- C. eliminate "Log at Session Start" security rules
- D. convert port-based security rules to application-based security rules

Correct Answer: D

QUESTION 5

Which statements is true regarding a Heatmap report?

- A. When guided by authorized sales engineer, it helps determine the areas of greatest security risk.
- B. It provides a percentage of adoption for each assessment area.

C. It runs only on firewall.

D. It provides a set of questionnaires that help uncover security risk prevention gaps across all areas of network and security architecture.

Correct Answer: B
