### QUESTION 1

According to the GDPR, for which situations should a Data Protection Impact Assessment (DPIA) be conducted?

- A. For all projects that include technologies or processes that require data protection
- B. For all sets of similar processing operations with comparable risks
- C. For any situation where technologies and processes will be subject to a risk assessment
- D. For technologies and processes that are likely to result in a high risk to the rights of data subjects

Correct Answer: A

---

### QUESTION 2

What is the role of the one assigned the responsibility to govern the purposes and means of processing personal data within an organization, according to the GDPR?

- A. Controller
- B. Data Protection Officer
- C. Data Subject
- D. Processor

Correct Answer: A

---

### QUESTION 3

A good practice is to lock the computer automatically or manually when you are away from the workstation.

The company's DPO realizes that this procedure is not being followed by employees. This occurrence should be classified in which category?

- A. Classified as a security vulnerability
- B. Classified as a security incident
- C. There is no specific category.
- D. Classified as a data breach

Correct Answer: A

This occurrence should be classified as a security vulnerability, as it does not state whether an incident occurred for this

reason.

However, the failure in this procedure can allow an incident to occur if an unauthorized person has access to the workstation.

Vulnerability is the means by which an attack can cause an information security incident.

#### QUESTION 4

A processor is instructed to report on customers who bought a product both last month and at least once in the three months before that. Unfortunately, the processor makes a mistake and uses personal data collected by another controller for a different purpose. The mistake is found before the report is created, and nobody has access to personal data he or she should not have had access to.

How should the processor act on this situation and what should the controller do, if anything?

- A. The processor must notify the controller and the controller must notify the Data Protection Authority of a data breach.
- B. The processor must notify the controller of a data breach. The controller must assess the possible risk to the data subjects.
- C. The processor must notify the Data Protection Authority of a data breach. The controller must execute a PIA to assess the risk to data subjects.
- D. The processor must restart processing using the right data. There is no need for the controller to act.

Correct Answer: B

---

#### QUESTION 5

Which of the parts below can implement data protection by design (from conception)?

- A. The data subject.
- B. The Data Protection Officer (DPO).
- C. The processor.
- D. The supervisory authority.

Correct Answer: C

It is the duty of the processor to guarantee security in the treatment of the data entrusted to it by the controller.
