QUESTION 1

You are designing a form that uses a repeating grid to display office furniture items. Which two data sources can you use as a source for a repeating grid? (Choose two.)

- A. Local data storage
- B. A page group property that holds the data
- C. A page list property that holds the data
- D. A single value property that contains the data in a local list

Correct Answer: BC

QUESTION 2

You need to configure a case type to send a confirmation for change-of-address requests. The confirmation is sent to customers as an email, text message, and letter. Which two options ensure that the content of the confirmation is the same for all three correspondence types? (Choose two.)

- A. Create one correspondence rule containing the confirmation, then circumstance the correspondence rule for each correspondence type.
- B. Create one correspondence rule for each correspondence type. Configure each correspondence rule to reference another correspondence rule that contains the confirmation.
- C. Create one correspondence rule containing the confirmation. Configure the correspondence rule to support all three correspondence types.
- D. Create one correspondence rule for each correspondence type. Configure each correspondence rule to reference a paragraph rule that contains the confirmation.

Correct Answer: AB

QUESTION 3

In an airline reservation application, users enter departure and return dates and submit for flight search. This is implemented as a flow action. You need to ensure that the return date is later than the departure date. You also need to copy the dates to a search parameter page that is used for flight search.

Select the two rule types that the flow action references to satisfy these requirements. (Choose two)

- A. Edit Validate
- B. Validate
- C. Service Level
- D. Data Transform

Correct Answer: BD

QUESTION 4

Match each development task to the appropriate role.

Select and Place:

| Development Task | Role |
|---|-------------------------|
| Direct the development of an auditing process for purchase requests. | System Architect |
| Design the class hierarchy of an application to share assests between IT and Accounting applications. | Lead System Architect |
| Configure a form to display the current department budget when entering a purchase request. | Senior System Architect |

Correct Answer:

| Development Task | Role |
|---|-------------------------|
| Configure a form to display the current department budget when entering a purchase request. | System Architect |
| Direct the development of an auditing process for purchase requests. | Lead System Architect |
| Design the class hierarchy of an application to share assests between IT and Accounting applications. | Senior System Architect |

QUESTION 5

A process includes standard and gold program levels. When the deadline has passed for gold level cases, the system transfers the case to the manager. Which two configurations would you make to the SLA to support this requirement? (Choose two.)

- A. Add an advance flow action to the deadline.
- B. Add a transfer action to the deadline.
- C. Increase the urgency level for gold level cases.
- D. Use a when condition test for gold level cases.

Correct Answer: AB
