QUESTION 1

A shipping case needs to wait a specific time period before progressing in its flow. The developer is considering using a wait shape or an assignment with an SI A to perform this function. Identify the two requirements for which a wait shape is the simpler approach. (Choose Two)

- A. Adjust the case urgency when the assignment is created.
- B. Manually step past the waiting point prior to the designated time.
- C. Present a custom UI form to the user while waiting to expire.
- D. Automatically bypass locking when the assignment is created.

Correct Answer: BD

QUESTION 2

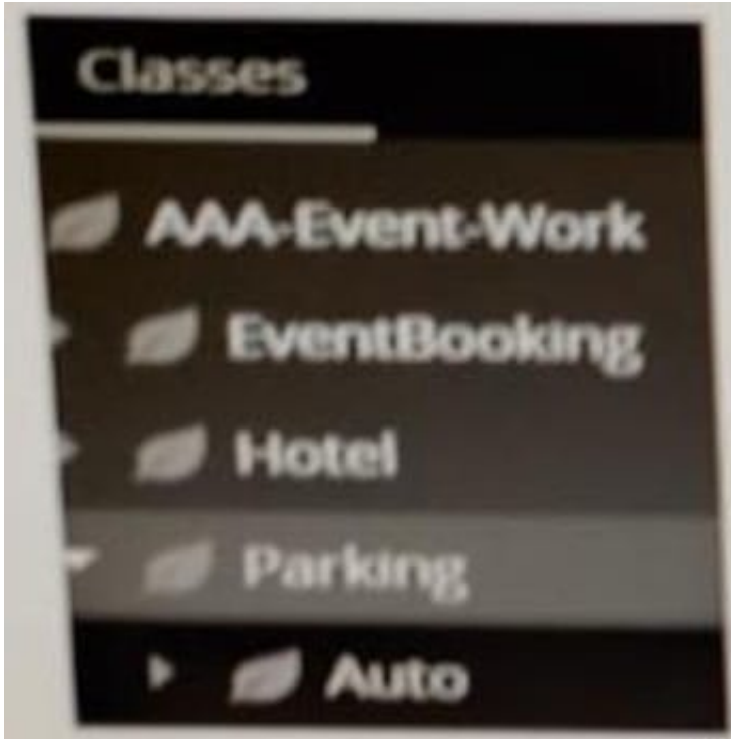

When do you use the load-datapage activity method?

- A. To refresh a data page
- B. To queue the data page for a default agent
- C. To initiate the loading of a data page
- D. To run a connector asynchronously

Correct Answer: C

QUESTION 3

Using the information shown in the Class structure, select the correct statement.

- A. Auto must be a subcase of Parking.
- B. Instances of EventBooking and Hosted can be stored in a separate.
- C. EventBooking cannot be a subcase of Auto.
- D. Parking and Auto instances must be stored in the same table.

Correct Answer: D

QUESTION 4

Six weeks after you deliver your application to production, your users report that the application slows down in the afternoon. The application is almost completely unresponsive for some users shortly after 3:00 P.M. Other users do not experience this problem until later in the day.

You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer.

You need to resolve this issue because a new division of the organization will start using the application next month.

How do you begin your research to diagnose the cause of the reported performance issue?

- A. Look at the performance profile and DB Trace output from each node.
- B. Observe the cluster and node status on the Enterprise Health Console.
- C. Review guardrail warnings in the development environment to determine if any rules with warnings moved to production.

D. Download the alert log file from each node and analyze the contents in the Pega Log Analyzer.

Correct Answer: B

QUESTION 5

Identify three rule types that are used in defining Authentication Service data instances. (Choose Three)

- A. Data pages
- B. Activities
- C. Connectors
- D. Reports
- E. Data transforms

Correct Answer: ABC
