QUESTION 1

Set the three security tasks you perform when deploying an application to a production environment. (Choose Three)

- A. Delete the Unauthenticated access group.
- B. Restrict access to ruleset configuration.
- C. Change the Rule security mode setting on the access groups to Deny.
- D. Rename the PRServlet default servlets.
- E. Update standard dynamic system settings.

Correct Answer: BDE

QUESTION 2

You oversee a medium-size development team. Some of the team members are new to Pega and are working on features in a separate branch. What are two ways you can ensure that the rules the team creates adhere to best practices? (Choose Two)

- A. Run 1 rarer on each new rule in the branch that new team members check in to identify any failures in rule execution.
- B. Leverage the branch review feature to have senior team members validate the branch contents.
- C. Use Pega Log Analyzer to locate any exceptions in the branch associated with the new team members.
- D. Review the branch quality to identify any rules with guardrail warnings.

Correct Answer: BD

QUESTION 3

How do you begin your research to diagnose the cause of the reported performance issue?

- A. Look at the performance profile and DB Trace output from each node.
- B. Observe the cluster and node status on the Enterprise Health Console.
- C. Review guardrail warnings in the development environment to determine if any rules with warnings moved to production.
- D. Download the alert log file from each node and analyze the contents in the Pega Log Analyzer.

Correct Answer: B

Explanation: Six weeks after you deliver your application to production, your users report that the application slows

down in the afternoon. The application is almost completely unresponsive for some users shortly after

3:00 P.M. Other users do not experience this problem until later in the day.

You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer. You need to resolve this issue because a new division of the organization will start

using the application next month.

QUESTION 4

What advantage does a rule-utility-function have over a rule-obj-activity?

- A. Ability to be circumstanced
- B. Ability to be saved multiple rulesets
- C. Ability to be directly called from a decision table
- D. Ability to be used to enforce security

Correct Answer: C

QUESTION 5

DRAG DROP

You are managing distributed, geographically dispersed, development teams A, B and C.

Team A is ready to merge changes into their development environment to make available changes to Team B\\'s Team C\\'s.

To ensure all development teams are working with the latest version of shared rule base, select and move all of the following tasks to the tasks List Order column and place them in the correct order.

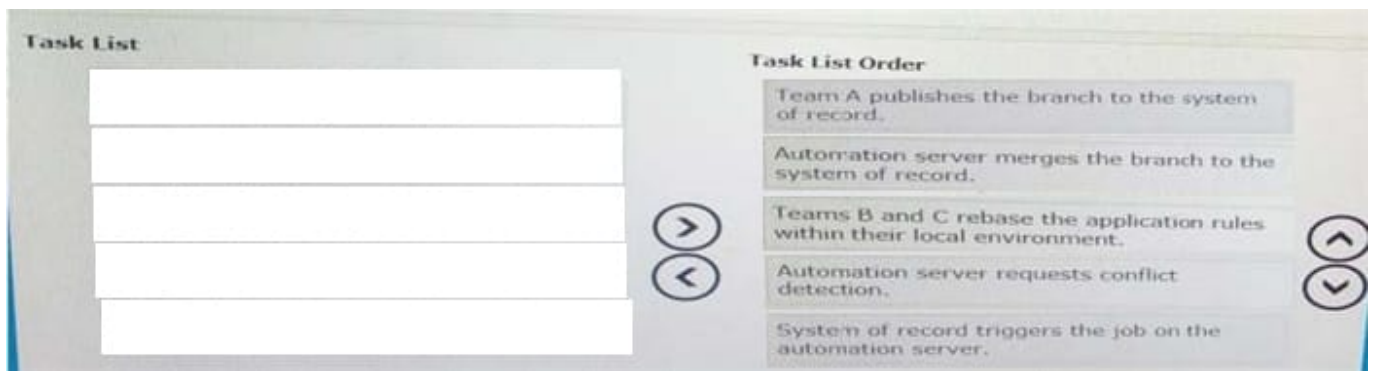

Select and Place:

Task List

- Teams B and C rebase the application rules within their local environment.
- Automation server merges the branch to the system of record.
- Automation server requests conflict detection.
- Team A publishes the branch to the system of record.
- System of record triggers the job on the automation server.

Task List Order
