QUESTION 2

An Insurance Call Center project requires the use of the Interaction Framework. The supporting applications should perform specific work when processing claims. The claim requires the claim number and the claim date, but it may also share other claim information in the interaction's context values.

Based on the information, which interaction.xml activity entry configures the project requirements?

- A.
- ```
<Activity Name="ProcessClaim"
 <Value Name="ClaimNum" Type="String"/>
 <Value Name="ClaimDate" Type="String"/>>
</Activity>
```
- B.
- ```
<Activity Name="ProcessClaim"> </Activity>  
  <Value Name="ClaimNum" Type="String"/>  
  <Value Name="ClaimDate" Type="String"/>
```
- C.
- ```
<Activity Name="ProcessClaim">
 <Value Name="ClaimNum" Type="String" />
</Activity>
<Activity Name="ProcessClaim">
 <Value Name="ClaimDate" Type="String" />
</Activity>
```
- D.
- ```
<Activity Name="ProcessClaim">  
  <Value Name="ClaimNum" Type="String"/>  
  <Value Name="ClaimDate" Type="String"/>  
</Activity>
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D

QUESTION 3

DRAG DROP

Pega Robot Studio has several methods to manage the flow of an automation depending on when a control is matched. In the Answer Area, drag the description on the left to its matching Design Block.

Select and Place:

Answer Area	Description	Design Block
This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.		
This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.		
This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.		
This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.		

Correct Answer:

Answer Area	Description	Design Block
	This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.	
	This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.	
	This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.	
	This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.	

QUESTION 4

When performing application discovery, it is important that you _____ and _____ . (Choose two.)

- A. utilize test methods to validate that you can interact with representatives of the controls in the use case
- B. write automations to accomplish the basic search functionality of the application
- C. interrogate all controls required for the use case
- D. interrogate 100 percent of the controls in the application

Correct Answer: AB

QUESTION 5

The Automation Playback window allows you to _____.

- A. open a log file and step through it as if you were running your solution in debug mode
- B. replay your last Runtime session where the applications are provided with the same account numbers automatically
- C. open a log file and debug any exceptions
- D. rerun the last automation that ran with the same values as inputs automatically entered

Correct Answer: B
