QUESTION 1

You are implementing a UI form collecting job applicant information. Users must provide values to certain fields before submitting the form. Which configuration adds asterisks to indicate the mandatory fields on the form?

- A. Use multiple Validate rules for each mandatory field
- B. Use an Edit Validate rule to verify if each of the mandatory properties has a value
- C. Use a Validate rule to verify the mandatory fields have a value
- D. Configure the mandatory fields as Required in the section rule

Correct Answer: C

QUESTION 2

An online retailer allows customers to select a courier service for deliveries. The list of available courier services is drawn from a data type sourced in the Pega database. The Fulfillment department wants to allow local warehouse managers to add courier services to mitigate increases in delivery times and remove courier services that fail to meet delivery metrics.

Which two options are required to allow local warehouse managers to update courier service records in production? (Choose two.)

- A. Create an access group for local warehouse managers.
- B. Delegate the records for the courier service data type.
- C. Define an approval process for adding and removing courier services.
- D. Enable rule checkout for the local warehouse managers.

Correct Answer: BC

QUESTION 3

A form listing nearby restaurants has four columns: Restaurant name Restaurant location Thumbnail image of the seating area Make reservation (check box)

You want to ensure that users have the information they need to make a reservation regardless of screen size. When viewed on a small screen, you do not need to display images.

What three configuration steps do you take to support this requirement? (Choose three.)

- A. Set the importance of the Make reservation column to Primary.
- B. Set the importance of the Restaurant name column to Primary.
- C. Set the importance of the image column to Other.

D. Set the importance of the image column to Secondary.

E. Set the importance of the Restaurant location and Make reservation columns to Secondary.

F. Set the importance of the Restaurant name and Make reservation columns to Primary.

Correct Answer: BDF

QUESTION 4

HOTSPOT

An online retailer creates a case type that processes and manages customer orders. The checkout process has four steps:

1.

Review Order: The customer reviews the items in order of add-to-cart selection and can adjust the quantity of each item and delete items to calculate and display the order total.

2.

Select Shipping Option: The customer selects a shipping option to determine and display the shipping charge for their order.

3.

Enter Delivery Address: The customer enters their delivery address to determine the sales tax, if applicable, and the application displays the calculated sales tax.

4.

Enter Payment Information: The customer selects a payment option and confirms the grand total of the order.

For each calculation, identify the appropriate chaining option to maximize the performance.

Hot Area:

**Answer Area**

Line total (item price * quantity)

Forward chaining
Backward chaining

Order total (sum of line totals)

Forward chaining
Backward chaining

Shipping charge (calculated from a decision rule)

Forward chaining
Backward chaining

Sales tax (order total * tax rate)

Forward chaining
Backward chaining

Grand total (order total + sales tax + shipping charge)

Forward chaining
Backward chaining

Correct Answer:

Answer Area

Line total (item price * quantity)

Forward chaining
Backward chaining

Order total (sum of line totals)

Forward chaining
Backward chaining

Shipping charge (calculated from a decision rule)

Forward chaining
Backward chaining

Sales tax (order total * tax rate)

Forward chaining
Backward chaining

Grand total (order total + sales tax + shipping charge)

Forward chaining
Backward chaining

QUESTION 5

DRAG DROP

Select each description on the left and drag it to the correct property mode on the right.

Select and Place:

<u>Description</u>	<u>Description</u>	<u>Property Mode</u>
A numerically ordered list of customer accounts where the accounts relate to one another.		Single Value
An unordered list of the customer home, business and mailing addresses where each address contains the street, city, state, and postal code.		Page Group ☞
The date of purchase on an expense report.		Page List

Correct Answer:

<u>Description</u>	<u>Description</u>	<u>Property Mode</u>
	The date of purchase on an expense report.	Single Value
	An unordered list of the customer home, business and mailing addresses where each address contains the street, city, state, and postal code.	Page Group ☞
	A numerically ordered list of customer accounts where the accounts relate to one another.	Page List
