QUESTION 1

An on-demand transportation application has a Conversation preference data type. When customers use the application to request a ride, they can specify their conversation preference: whether they would like to talk to their driver or if they would prefer silence. Company stakeholders are interested in analyzing the conversation preference data.

How is the Conversation preference data type sourced?

- A. Local system of record
- B. No system of record
- C. External system of record

Correct Answer: C

QUESTION 2

Your online shopping application serves international customers. You need to define a Data Page that holds currency exchange rates. All users accessing the application need to use the information. The Scope of this Data Page should be set to _____.

- A. Application
- B. Node
- C. Thread
- D. Requestor

Correct Answer: B

QUESTION 3

You are implementing a UI form collecting job applicant information. Users must provide values to certain fields before submitting the form. Which configuration adds asterisks to indicate the mandatory fields on the form?

- A. Use multiple Validate rules for each mandatory field
- B. Use an Edit Validate rule to verify if each of the mandatory properties has a value
- C. Use a Validate rule to verify the mandatory fields have a value
- D. Configure the mandatory fields as Required in the section rule

Correct Answer: C

QUESTION 4

A form listing nearby restaurants has four columns: Restaurant name Restaurant location Thumbnail image of the seating area Make reservation (check box)

You want to ensure that users have the information they need to make a reservation regardless of screen size. When viewed on a small screen, you do not need to display images.

What three configuration steps do you take to support this requirement? (Choose three.)

- A. Set the importance of the Make reservation column to Primary.
- B. Set the importance of the Restaurant name column to Primary.
- C. Set the importance of the image column to Other.
- D. Set the importance of the image column to Secondary.
- E. Set the importance of the Restaurant location and Make reservation columns to Secondary.
- F. Set the importance of the Restaurant name and Make reservation columns to Primary.

Correct Answer: BDF

QUESTION 5

A reservation process allows customers to reserve a flight, hotel room, and rental car as part of a travel itinerary. Which configuration displays a check box to allow users to select travel insurance only if the itinerary includes a flight?

- A. A visible when condition applied to the check box
- B. An action set applied to the check box
- C. A declare expression configured for forward chaining
- D. A validate rule applied to the flow action

Correct Answer: B
