- B. Label Positioning
- C. Number of columns in each row
- D. Alignment of field values

Correct Answer: BC

QUESTION 2

In which situation do you configure branched rulesets?

- A. One team creates a new patch for an application while another team creates a new major version of the application
- B. You need to delegate rules to process owners from the business
- C. Multiple teams need to work on the same application version
- D. A team needs to work on the next version of an application while preparing to migrate the current version.

Correct Answer: C

QUESTION 3

Users can access an apartment hunting application from different devices with different screen sizes.

A screen displays the photos of available properties. By default, the photos are displayed in three columns. When the screen width is less than 800 pixels, the photos should be displayed in two columns. How do you implement the screen for this requirement?

- A. Use a dynamic layout with a responsive breakpoint at 800 pixels to change from inline- grid tripleto inline-grid double format.
- B. Use a column layout with a responsive breakpoint at 800 pixels to hide the left column.
- C. Circumstance the layout to display different number of columns at different screen sizes.
- D. Circumstance the section rule to display different number of columns at different screen sizes.

Correct Answer: A

QUESTION 4
