QUESTION 1

You are developing a canvas app.

You need to apply business rules to the app without writing code.

Which three actions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Validate data and show error messages.
- B. Enable or disable fields.
- C. Set field requirement levels.
- D. Set field values.
- E. Show or hide fields

Correct Answer: ACD

The following actions are not available on Canvas apps: Show or hide columns Enable or disable columns Create business recommendations based on business intelligence

QUESTION 2

DRAG DROP You plan to automate several different processes by using Power Automate.

Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components

- Attended UI flow
- Unattended UI flow
- Flow that uses a custom connector
- Flow that uses a prebuilt connector

Answer Area

Process	Component
Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Component
Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Component

Correct Answer:

Components

- Attended UI flow
-
-
- Flow that uses a prebuilt connector

Answer Area

Process	Component
Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Flow that uses a custom connector
Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Unattended UI flow

1: Custom connector (REST API access)

2: Unattended UI flow

QUESTION 3

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled.

You need to recommend a storage solution that keeps storage costs low.

Solution: Enable Outlook integration

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead enable server-based SharePoint integration.

QUESTION 4

You are configuring a new Power Apps portal. You have two web roles, one for authenticated users and one for anonymous users. You grant the Anonymous Users role to users.

A test user reports that they can access the home page but cannot view a page linked from the home page.

You need to determine why the test user cannot view the portal page.

What is the cause of the issue?

- A. Maintenance mode is enabled on the portal.
- B. The setting to make the page available to everyone is disabled.
- C. The Authenticated Users Web role does not have permission to view the page.
- D. Inherited permissions are not enabled for the linked page.

Correct Answer: D

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/webpage-access-control>

QUESTION 5

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new JavaScript web resource by using the code from the third-party library. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- B. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.
- C. Add the code from the third-party JavaScript library to MyBusinessLogic. Add MyBusinessLogic to the solution.
- D. Add only the third-party JavaScript web resource to the solution.

Correct Answer: AC
