QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user

named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: Change Elisabeth's username in the user record for the app.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

DRAG DROP

A company uses Common Data Service to store sales data.

For the past few quarters, the company has experienced a decrease in sales revenue. The company wants to improve sales forecasting.

The company plans to use AI Builder to implement the solution. You select fields that will be used for prediction.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

- Export data from Common Data Service into Microsoft Excel
- Train the category classification AI model by using Common Data Service data
- Train the AI model by using data exported to Microsoft Excel
- Publish the AI model
- Use the model with Power Apps
- Import the AI model analysis into Common Data Service
- Train the prediction AI model by using Common Data Service data

Correct Answer:

Actions

Export data from Common Data Service into Microsoft Excel

Train the AI model by using data exported to Microsoft Excel

Import the AI model analysis into Common Data Service

Train the prediction AI model by using Common Data Service data

Answer Area

Train the category classification AI model by using Common Data Service data

Publish the AI model

Use the model with Power Apps

Step 1:

Before you can use your prediction model, you have to train it to perform the way you want.

Step 2:

After you train your model, publish it to make it available.

Publish your model when you want to make it available to users in your Power Apps environment.

Step 3: Use the model with Power Apps

QUESTION 3

DRAG DROP

A company has a portal. Users sign into the portal by using a social media account.

The company wants to replace the existing portal with a Power Apps portal. users must sign up for access to the portal by using a Microsoft account and a unique invitation code that will be provided to the users.

You need to configure authentication for the home page.

Which values should you use? To answer, drag the appropriate values to the appropriate authentication settings. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Values

Yes	No
-----	----

Authentication setting

External sign in

Open registration

Value

Value

Correct Answer:

Values

Yes	No
-----	----

Authentication setting

Value

External sign in

No

Open registration

No

QUESTION 4

You need to build a Power BI dashboard for sales managers to track opportunities.

When a new sale closes that is greater than \$1 million, a notification must pop up and an email must be sent to the leadership team.

You need to ensure the email is sent without editing the Microsoft Dataverse.

Which two elements should you configure? Each correct answer is part of the solution.

NOTE: Each correct selection is worth one point.

- A. a Power Automate flow
- B. a calculated column in the Dataverse
- C. a paginated report to save to Microsoft OneDrive
- D. a custom connector
- E. alerts in Power BI

Correct Answer: AE

A Microsoft Power Automate template can be used to send an email when a Power BI data alert is triggered. Also notify relevant people when a Power BI data alert fires without you having to manually let them know. Reference: <https://powerautomate.microsoft.com/en-US/templates/details/128d580b89e346b0896988e8e7d9b69c/alert-your-team-via-email->

when-a-power-bi-data-alert-is-triggered/

QUESTION 5

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled.

You need to recommend a storage solution that keeps storage costs low.

Solution: Enable server-based SharePoint integration.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A
