QUESTION 1

You need to create the custom connector that will be used to retrieve member information. Which authentication option should you use?

- A. API key
- B. No authentication
- C. OAuth 2.0
- D. Basic
- E. Windows

Correct Answer: C

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a solution for a medical practice. The solution must use an artificial intelligence (AI) model to evaluate medical X-ray images and detect broken bones.

You need to create the AI model for the solution.

Solution: Use Visual Studio to create the model.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You need to ensure that the solution uses the correct accounts payable mailbox.

Which three actions should you perform? Each correct answer part of the solution, NOTE: Each correct selection is worth one point.

- A. Set the current value for the accounts payable mailbox in the environment.
- B. Set the default value for the accounts payable mailbox in the environment.
- C. Turn off and then turn on the cloud flows.
- D. Use separate environment variables for the cloud flow and the canvas app.
- E. Use one environment variable for both the cloud flows and the canvas app.

Correct Answer: ACE

To ensure that the solution uses the correct accounts payable mailbox, you need to perform three actions:

1.

Set the current value for the accounts payable mailbox in the environment. This will update the value of the environment variable that stores the email address of the accounts payable mailbox1.

2.

Turn off and then turn on the cloud flows. This will refresh the cloud flows and make them use the updated value of the environment variable1.

3.

Use one environment variable for both the cloud flows and the canvas app. This will ensure consistency and avoid duplication of data across different components of your solution1.

QUESTION 4

HOTSPOT

You are developing an automation solution for a bank. The solution will use a cloud flow and a desktop flow. The cloud flow retrieves sensitive information from Azure Key Vault and must pass the information to the desktop flow.

You configure a Get secret action as shown in the Get secret exhibit.

You configure the desktop flow as shown in the Desktop flow exhibit.

Get secret

Recurrence

Settings for 'Get secret'

Secure Inputs

Secure inputs of the operation.

Secure Inputs ☒ On

Secure Outputs

Secure outputs of the operation and references of output properties.

Secure Outputs ☐ Off

Asynchronous Pattern

With the asynchronous pattern, if the remote server indicates that the request is accepted for processing with a 202 (Accepted) response, the Logic Apps engine will keep polling the URL specified in the response's location header until reaching a terminal state.

Asynchronous Pattern ☒ On

Automatic decompression

Automatically decompress gzip response.

Automatic decompression ☒ On

Timeout

Limit the maximum duration an asynchronous pattern may take. Note: this does not alter the request timeout of a single request.

Duration ⓘ

Retry Policy

A retry policy applies to intermittent failures, characterized as HTTP status codes 408, 429, and 5xx, in addition to any connectivity exceptions. The default is an exponential interval policy set to retry 4 times.

4 / 8

You need to ensure that no one can preview sensitive information by viewing the cloud flow or desktop flow run details.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statement	Yes	No
The Get Secret action is configured to protect sensitive data in the cloud flow.	<input type="radio"/>	<input type="radio"/>
The desktop flow is configured to protect account login and password data.	<input type="radio"/>	<input type="radio"/>
Data extracted by the desktop flow is visible to users.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statement	Yes	No
The Get Secret action is configured to protect sensitive data in the cloud flow.	<input type="radio"/>	<input checked="" type="radio"/>
The desktop flow is configured to protect account login and password data.	<input type="radio"/>	<input checked="" type="radio"/>
Data extracted by the desktop flow is visible to users.	<input checked="" type="radio"/>	<input type="radio"/>

No. output is not secure.

No. variable should be marked as sensitive.

Yes. variable not marked as sensitive.

QUESTION 5

DRAG DROP

You plan to create a Microsoft Visio process diagram.

You need to create the diagram and then export the diagram as a Power Automate flow.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Map shapes to flow actions.

Create the diagram by using standard flowchart shapes.

Select **Prepare to Export** in the toolbar

Name the flow and select **Create Flow**.

Select **Export to Flow**.

Create the diagram by using BPMN shapes.

Answer Area

Correct Answer:

Actions

Create the diagram by using standard flowchart shapes.

Answer Area

Create the diagram by using BPMN shapes.

Select **Prepare to Export** in the toolbar

Map shapes to flow actions.

Select **Export to Flow**.

Name the flow and select **Create Flow**.
