QUESTION 1

HOTSPOT

You create an environment for a company. You need to configure security to meet the company\'s requirements and follow the principle of least privilege. Which security roles should you assign? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Hot Area:

Requirement	Security role
A user must be able to register new machines in the environment.	Environment Maker Desktop Flows Machine Owner
A user must be able to share their machine with another user.	Environment Maker Desktop Flows Machine User Desktop Flows Machine User Can Share
A user must be able to run desktop flows on a registered machine.	Environment Maker Desktop Flows Machine User Desktop Flows Machine User Can Share
A user must be able to create a machine group and add machines to the machine group.	Environment Maker Desktop Flows Machine User Desktop Flows Machine Owner

Correct Answer:

Requirement	Security role
A user must be able to register new machines in the environment.	Environment Maker Desktop Flows Machine Owner
A user must be able to share their machine with another user.	Environment Maker Desktop Flows Machine User Desktop Flows Machine User Can Share
A user must be able to run desktop flows on a registered machine.	Environment Maker Desktop Flows Machine User Desktop Flows Machine User Can Share
A user must be able to create a machine group and add machines to the machine group.	Environment Maker Desktop Flows Machine User Desktop Flows Machine Owner

QUESTION 2

HOTSPOT

You are developing a cloud flow.

You write expressions for the following JSON object. (Line numbers are included for reference only.)

```
01  {
02      "customerNumber": 10091,
03      "customerPhones": [
04          "011-2345213",
05          "0114456129"
06      ]
07  }
```

The flow parses JSON data by using the following schema; For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
The expression empty(body('Parse_JSON')['customerName']) returns true.	O	O
The expression concat(body('Parse_JSON').customerName, ': ', body('Parse_JSON').customerNumber) returns 10091.	O	O
The expression equals(body('Parse_JSON')?.customerPhones[2], '') returns true.	O	O
The expression int(body('Parse_JSON')?['customerPhones']?[1]) returns 114456129.	O	O

Correct Answer:

Statements	Yes	No
The expression empty(body('Parse_JSON')['customerName']) returns true.	O	O
The expression concat(body('Parse_JSON').customerName, ': ', body('Parse_JSON').customerNumber) returns 10091.	O	O
The expression equals(body('Parse_JSON')?.customerPhones[2], '') returns true.	O	O
The expression int(body('Parse_JSON')?['customerPhones']?[1]) returns 114456129.	O	O

QUESTION 3

DRAG DROP

You develop automation solutions for a company. The company does not permit changes to a deployed solution in user acceptance testing (UAT) a environments.
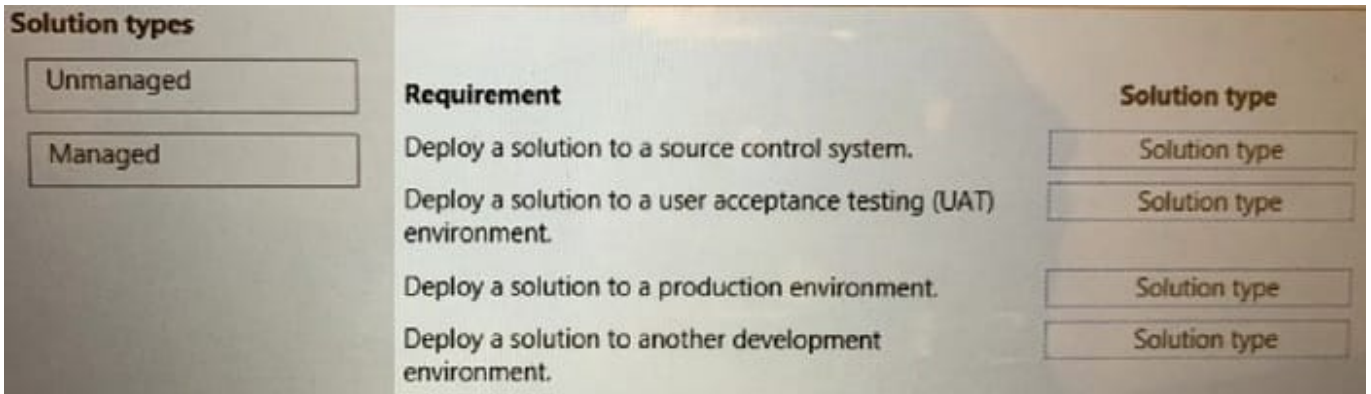

You need to package the solutions.

Which type of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more the once, or not at all. You may need to drag the split bar between panes or
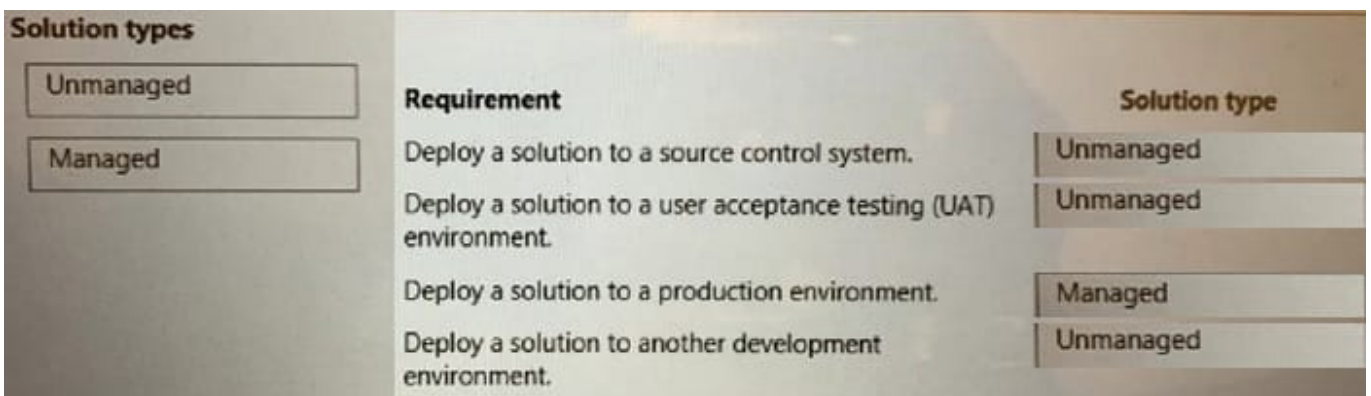

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Solution types

Unmanaged	
Managed	

Requirement	Solution type
Deploy a solution to a source control system.	Solution type
Deploy a solution to a user acceptance testing (UAT) environment.	Solution type
Deploy a solution to a production environment.	Solution type
Deploy a solution to another development environment.	Solution type

Correct Answer:

Solution types

Unmanaged	
Managed	

Requirement	Solution type
Deploy a solution to a source control system.	Unmanaged
Deploy a solution to a user acceptance testing (UAT) environment.	Unmanaged
Deploy a solution to a production environment.	Managed
Deploy a solution to another development environment.	Unmanaged

QUESTION 4

A Power Automate developer created the following script for the Member Management System desktop flow:

```
DF01  function ExecuteScript(){
DF02    document.GetElementsByClassName("address")[0].children[0].innerText
DF03  }
```

You need to set up a policy for the developer to perform desktop flow testing.

Which two actions should you do? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

A. Create a tenant-level Microsoft Power Platform data loss prevention (DLP) policy.

B. Add the custom connector to the Non-business connector group.

C. Create a Microsoft Power Platform data loss prevention (DLP) policy in the development environment.

D. Add the custom connector to the Business connector group.

E. Move the SharePoint connector to the Non-business connector group.

Correct Answer: CE

QUESTION 5

You need to implement security to resolve the invoice data issue

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Organization.

B. Select the Finance role, select Custom Entities and navigate to the table.

C. In Microsoft Power Platform admin center, navigate to the Users section.

D. In Microsoft Power Platform admin center, navigate to the Security roles section.

E. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit.

F. Select the Finance role select Core Records, and then navigate to the table.

Correct Answer: BDE

To implement security to resolve the invoice data issue, you need to perform three actions:

1.

In Microsoft Power Platform admin center, navigate to the Security roles section.This is where you can manage the security roles for your environment and assign them to users or teams.

2.

Select the Finance role, select Custom Entities and navigate to the table. This is where you can configure the access level for each entity in your environment based on your security role.

3.

Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit. This will restrict users with this role from creating or deleting records in this table, but allow them to read or write records within their business unit.
