QUESTION 1

A client would like you to create a custom connector. You need to configure the connector. Which element is required?

- A. API Key
- B. On-premises data gateway
- C. Power Automate per user license
- D. JSON sample for request
- E. Power Automate per flow license

Correct Answer: D

QUESTION 2

HOTSPOT

You develop automation solutions for a company.

You need to package the solutions.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Solution type
Share the solution with a colleague who uses a personal development environment.	<input type="checkbox"/> managed <input type="checkbox"/> unmanaged
Deploy the final solution to a production environment and prevent further development.	<input type="checkbox"/> managed <input type="checkbox"/> unmanaged

Correct Answer:

Requirement	Solution type
Share the solution with a colleague who uses a personal development environment.	<input type="checkbox"/> managed <input checked="" type="checkbox"/> unmanaged
Deploy the final solution to a production environment and prevent further development.	<input checked="" type="checkbox"/> managed <input type="checkbox"/> unmanaged

QUESTION 3

HOTSPOT

You are automating a form on a website. The website uses the following HTML markup to define each field on the form:

```
<div _ngcontent-c1="" class="col s6 m6 l6">  
  <div class="ng-invalid ng-dirty ng-touched">  
    <label>Field1</label><input ng-reflect-name="labelField1" class="ng-pristine ng-invalid ng-touched">  
  </div>  
</div>
```

The label for each field is unique in the form.

You need to write data to the form.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statement

You configure the following selector: `input[ng-reflect-name="labelField1"]`
The automation will add data to the form.

You configure the following selector: `div:has(label:contains("Field1")) > input`
The automation will add data to the form.

You add the **Run JavaScript function on web page** action to the flow:

```
function ExecuteScript() {  
    $("div:contains('Field1') > input")  
        .val("Field's 1 value")  
}
```

The action adds data to the form.

Yes	No
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statement

You configure the following selector: `input[ng-reflect-name="labelField1"]`
The automation will add data to the form.

You configure the following selector: `div:has(label:contains("Field1")) > input`
The automation will add data to the form.

You add the **Run JavaScript function on web page** action to the flow:

```
function ExecuteScript() {  
    $("div:contains('Field1') > input")  
        .val("Field's 1 value")  
}
```

The action adds data to the form.

Yes	No
<input type="radio"/>	<input checked="" type="radio"/>
<input checked="" type="radio"/>	<input type="radio"/>
<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 4

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other. You must minimize the amount of processing time required to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a do until loop.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

DRAG DROP

A company has an unattended cloud flow solution. The solution includes a desktop flow that runs on a virtual machine.

The company reports that the cloud flow processes more transactions per day than the planned capacity.

You need to scale the solution to keep up with demand.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Provision virtual machines.

Register the machines to the correct environment by using `flow.microsoft.com`.

Add the machines to a machine group.

Register the machines to the correct environment by using the machine runtime application.

Update the machine connections to target the machine group in the cloud flow.

Update the machine connections to target the machine group in the desktop flow.

Answer Area

Four empty green rectangular boxes for providing an answer.

Correct Answer:

Actions

Provision virtual machines.

Register the machines to the correct environment by using flow.microsoft.com.

Add the machines to a machine group.

Register the machines to the correct environment by using the machine runtime application.

Update the machine connections to target the machine group in the cloud flow.

Update the machine connections to target the machine group in the desktop flow.

Answer Area

Provision virtual machines.

Register the machines to the correct environment by using the machine runtime application.

Add the machines to a machine group.

Update the machine connections to target the machine group in the cloud flow.
