QUESTION 1

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database.

You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Explanation:

Need an on-premises data gateway.

Correct solution: Create a canvas app for expense data entry. Install an on-premises gateway. Create a cloud flow for approval and to add data to the SQL Server database.

The on-premises data gateway acts as a bridge. It provides quick and secure data transfer between on-premises data, which is data that isn\'t in the cloud, and several Microsoft cloud services. These services include Power BI, Power Apps,

Power Automate, Azure Analysis Services, and Azure Logic Apps.

Power Automate is a service that you can use to automate repetitive tasks to bring efficiencies to any organizations. You can create cloud flows, desktop flows, or business process flows.

QUESTION 2

HOTSPOT

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

Allow only the human resource manager to change an employee\'s employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	▼ Team access Privacy preference Field security profile Hierarchy security profile
Allow only approved device types to access the solution and company data.	▼ Endpoint security Compliancy policy Conditional access Mobile threat integration

Correct Answer:

Answer Area

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	▼ Team access Privacy preference **Field security profile** Hierarchy security profile
Allow only approved device types to access the solution and company data.	▼ Endpoint security **Compliancy policy** Conditional access Mobile threat integration

Box 1: Field security profile

Record-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to

specific fields.

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.

Box 2: Compliancy policy

Compliance policy settings – Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether

devices that haven\\'t received any device compliance policies are compliant or noncompliant.

Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.

Compliance policies in Intune:

Define the rules and settings that users and devices must meet to be compliant.

Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.

Can be combined with Conditional Access, which can then block users and devices that don\\'t meet the rules.

QUESTION 3

DRAG DROP

You are performing a requirements analysis for a customer.

The customer provides the following requirements:

1.

Power Platform storage capacity must remain under 100 percent.

2.

Customer service representatives must be sent an email when they are assigned a case.

3.

Help desk technicians must be shown an error message when they try to delete a task row.

4.

The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Requirement types	Requirement	Requirement type
	Microsoft Power Platform storage capacity must remain under 100 percent.	
Functional	Customer Service representatives must be sent an email when they are assigned a case.	
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	
	The plug-in pass rate must remain over 99 percent for the production environment.	

Correct Answer:

Answer Area

Requirement types	Requirement	Requirement type
	Microsoft Power Platform storage capacity must remain under 100 percent.	Non-functional
Functional	Customer Service representatives must be sent an email when they are assigned a case.	Functional
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	Functional
	The plug-in pass rate must remain over 99 percent for the production environment.	Non-functional

Box 1: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 2: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 3: Functional Box 4: Non-functional Reference:

https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/3-functional-requirements

QUESTION 4

A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads.

You need to recommend a solution that will incorporate this checklist.

What should you recommend?

A. Microsoft Customer Voice

B. Business Process Modeler task guide

C. Dashboards

D. Business Process Flow

Correct Answer: D

QUESTION 5

You need to recommend an environment for the inspection solution. Where should you recommend installing the solution?

A. within the Dynamics 365 Field Service environment

B. within the default Dynamics 365 Field Service environment

C. in a separate Microsoft Dataverse environment in the same instance as the Dynamics 365 Field Service environment

D. in a separate Dataverse environment with Dynamics 365 apps enabled

Correct Answer: A

General requirements include:

You must be able to reference inspection information and quality certification information from within Dynamics 365 Field Service. Technicians must be able to view referenced inspection information from the custom solution when they

perform maintenance on machines.
