QUESTION 1

A company is building an interactive chatbot to answer questions about product and product warranties.

You need to create conversation paths for questions about product warranties.

Which tool should you use?

- A. Azure Bot Framework
- B. Power Platform admin center
- C. Conversation node
- D. Authoring canvas
- E. Power Virtual Agents portal

Correct Answer: E

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/authoring-create-edit-topics>

QUESTION 2

DRAG DROP

A bank uses Power Platform apps and flows to support business processes.

The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Train the model.
- Use the model in PowerApps or Power Automate.
- Export data into AI Builder.
- Publish the model.
- Import data into Common Data Service.

Answer Area

Correct Answer:

Actions	Answer Area
	Import data into Common Data Service.
	Train the model.
Export data into AI Builder.	Publish the model.
	Use the model in PowerApps or Power Automate.

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a

Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model

Step 3: Publish the model

The last step is to publish your model.

Step 4: Use the model in PowerApps or Power Automate.

QUESTION 3

HOTSPOT

A company is using Power Automate to automate business processes.

You need to recommend triggers for Instant flows.

What trigger types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement

Trigger type

Run a flow when the user presses a button in a canvas app.

	▼
PowerApps	
for a selected row	
manually trigger a flow	
for a selected file (OneDrive for a Business)	

Run a flow when user presses a button in the mobile Flow app.

	▼
PowerApps	
for a selected row	
manually trigger a flow	
for a selected file (SharePoint)	

Correct Answer:

Requirement

Trigger type

Run a flow when the user presses a button in a canvas app.

	▼
PowerApps	
for a selected row	
manually trigger a flow	
for a selected file (OneDrive for a Business)	

Run a flow when user presses a button in the mobile Flow app.

	▼
PowerApps	
for a selected row	
manually trigger a flow	
for a selected file (SharePoint)
