QUESTION 1

DRAG DROP

A manufacturing company is evaluating AI Builder.

You need to select AI Builder models to address specified requirements.

Which model types should you use? To answer, drag the appropriate model types to the correct requirements. Each model type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

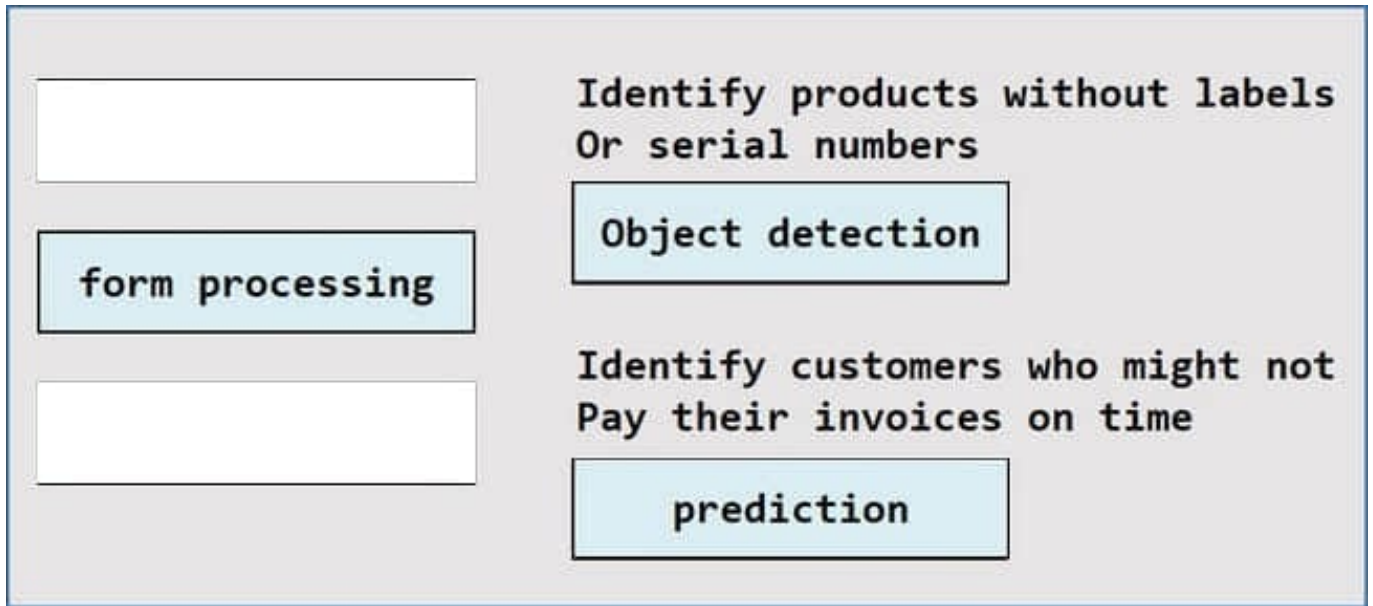

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

prediction	Identify products without labels Or serial numbers
form processing	Model type
Object detection	Identify customers who might not Pay their invoices on time
	Model type

Correct Answer:

Reference: <https://docs.microsoft.com/en-us/ai-builder/object-detection-model-in-flow> <https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

QUESTION 2

You are building a Power Automate flow to manage sales.

The sales team saves quotes as PDF files to a Microsoft OneDrive folder. You create a Microsoft SharePoint list to help the sales team manage follow ups to quotes.

You need to copy the customer name, phone number, and the amount of the potential sale from the sales quote and insert the data into the SharePoint list.

Which AI Builder model should you use?

- A. key phrase extraction
- B. sentiment analysis OC.
- C. text recognition
- D. language detection

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognition>

QUESTION 3

A business uses a form to collect information.

You create a business process flow for the form.

The top of the form must display where the user is in the process.

You need to identify what to configure at the top of the form.

What should you identify?

- A. Step
- B. Stage
- C. Branch
- D. Workflow

Correct Answer: B

QUESTION 4

DRAG DROP

You need to explain the major components of the Common Data Model (CDM) and their functions.

Match each term to its definition.

Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Entities
- Data connectors
- Common Data Service
- Common Data Model
- Microsoft Power Platform
- Workflows

Answer Area

- | Purpose |
|---|
| Helps jumpstart application development by leveraging business logic, security, and integrations. |
| A set of records used to store data. |

Tool

- | |
|------|
| Tool |
| Tool |

Correct Answer:

Tools

Data connectors
Common Data Service
Common Data Model
Workflows

Answer Area

Purpose
Helps jumpstart application development by leveraging business logic, security, and integrations.
A set of records used to store data.

Tool

Microsoft Power Platform
Entities

Box 1: Microsoft Power Platform

Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.

The Microsoft Power platform brings all your data together into a common data model.

Box 2: Entities

An entity is a set of records used to store data, similar to how a table stores data within a database.

QUESTION 5

You create a Power App portal.

When a user signs into the portal the following error displays: User not found

You confirm that the user's sign in information is correct.

You need to determine the cause of the error.

What should you do?

- A. Disable custom error messages.
- B. Create a custom error message.
- C. Enable diagnostic tools in Lifecycle Services.
- D. Enable Maintenance mode.

Correct Answer: C
