### QUESTION 1

Only technical writers can create documentation during a sprint

- A. False
- B. True

Correct Answer: A

Work that's part of the sprint is done by the developers, scrum doesn't have specific roles

---

### QUESTION 2

What is pair programming?

- A. Managers doing performance reviews by comparing one programmer's code to another's
- B. Two developers writing code together, providing constant peer review
- C. Two programmers writing code separately, but always review each other's pull requests
- D. Developer and tester work together to write and test code

Correct Answer: A

Pair programming means that two developers are coding together and performing live peer review. This will enhance the affectivity as it leads to increased code quality.

---

### QUESTION 3

What is technical debt?

- A. A term representing the eventual consequences of poor technical choices
- B. Developers that have to pay college debt
- C. Code that hasn't been documented
- D. The money an organization owes to tool and hardware vendors

Correct Answer: A

Technical debt is the result of incomplete work going into the increment and poor design and architectural choices.

---

### QUESTION 4

How much time will there be after a sprint before the next one starts?

- A. Enough to deploy the increment and update the product backlog based on the outcome of the sprint review
- B. Enough to clean up lingering definition of done points
- C. None, a new sprint starts immediately after the end of the previous one
- D. At most a week for a one-month sprint

Correct Answer: C

The scrum guide says: "A new Sprint starts immediately after the conclusion of the previous Sprint."

---

#### QUESTION 5

When do the developers participate in the product backlog refinement?

- A. Never, it is the sole responsibility of the Product owner to refine the backlog
- B. Only during the sprint planning
- C. Anytime during the sprint
- D. Only during the refinement meetings planned by the PO

Correct Answer: C

There is no set time for product backlog refinement.
