Correct Answer:

	Navigate to Settings > Advanced > Incident Types
	Select the incident type you want to customize the layout view for
	Edit the layout
	Select the Edit Layout option
	Navigate to Settings > Layout Builder

### QUESTION 3

An administrator has a critical group of systems running Windows XP SP3 that cannot be upgraded. The administrator wants to evaluate the ability of Traps to protect these systems and the word processing applications running on them.

How should an administrator perform this evaluation?

- A. Gather information about the word processing applications and run them on a Windows XP SP3 VM. Determine if any of the applications are vulnerable and run the exploit with an exploitation tool.
- B. Run word processing exploits in a latest version of Windows VM in a controlled and isolated environment. Document indicators of compromise and compare to Traps protection capabilities.
- C. Run a known 2015 flash exploit on a Windows XP SP3 VM, and run an exploitation tool that acts as a listener. Use the results to demonstrate Traps capabilities.
- D. Prepare the latest version of Windows VM. Gather information about the word processing applications, determine if some of them are vulnerable and prepare a working exploit for at least one of them. Execute with an exploitation tool.

Correct Answer: C

### QUESTION 4

The prospect is deciding whether to go with a phishing or a ServiceNow use case as part of their POC. We have integrations for both but a playbook for phishing only. Which use case should be used for the POC?
