QUESTION 1

A company is trying to understand which platform can be installed on their environment: Select the three endpoints where Traps can be installed (Choose three).

- A. Windows 10 LTSC with 2 GB RAM, 500MB free disk space and Intel Core i5 CPU
- B. Windows 2000 SP4 with 1 GB RAM, 4 GB free disk space and Intel Pentium 4 CPU
- C. Apple iPhone 6s
- D. Windows Server 2012 R2 Standard Edition in FIPS Mode, with 4GB RAM, 20GB free disk space, running on VMware ESXi.
- E. 15" MacBook Pro running macOS 10.12 with 16GB RAM, Intel Core i7 CPU and 100GB free disk space

Correct Answer: ADE

QUESTION 2

A company is using a Web Gateway/Proxy for all outbound connections. The company has deployed Traps within the domain and in testing, discovered that the ESM Servers are unable to communicate with WildFire. All other Traps features are working.

What is the most likely cause of the issue?

- A. The administrator needs to configure WildFire proxy settings in each Agent Console.
- B. The administrator needs to configure WildFire proxy settings in the ESM Console and in each Agent Console.
- C. The Administrator needs to purchase the additional site license required for WildFire.
- D. The Administrator needs to configure WildFire proxy settings in the ESM Console.

Correct Answer: D

QUESTION 3

An administrator receives an alert indicating the ESM service is not starting on the ESM Server. When the administrator tries to start the service manually, the administrator receives an error. "The Endpoint Security Manager service on Local Computer started and then stopped."

What is the cause of the failure?

- A. The Account assigned to the service does not have "Log on as a batch job" permissions on the machine.
- B. The Account assigned to the service does not have "Log on as a service" permissions on the machine.
- C. The Account assigned to the service is not the Local Administrator on the machine.

D. The Account assigned to the service is not an Active Directory Domain user.

Correct Answer: B

QUESTION 4

A customer has an environment with the following: 1,000 agents communicating over SSL with two servers - one containing the ESM Server and another one where the ESM Console is installed BitsUploads resides on the ESM Console server

ESM Server and Console are using the default pods for communication In a scenario where a file is failing to be uploaded from macOS, which three reasons could be directly related to the failure? (Choose three.)

- A. Traps agent is not able to check in with the ESM Server
- B. The rate of upload is lower than 100Kb/S
- C. The BITS address in the ESM is incorrect
- D. Port 2125 is blocked on the server which hosts BitsUploads
- E. Port 443 is blocked on the server which hosts BitsUploads

Correct Answer: ACE

QUESTION 5

An administrator has installed Traps 4.0. The administrator wants to test the malware protections provided. What sample should they use to test the protections provided by Traps?

- A. A sample with a low number of hits in Virus Total
- B. A toolbar package known to be flagged as grayware by Traps
- C. A sample known to generate false positives in the production environment
- D. An MS Office document which contains a ransomware macro

Correct Answer: D
