QUESTION 1

Which two cloud providers support Load Balancers as next hop configurations for outbound connections? (Choose two.)

- A. Google Cloud Platform
- B. Microsoft Azure
- C. Oracle Cloud
- D. Amazon Web Services

Correct Answer: AC

QUESTION 2

Which two items are required when a VM-100 BYOL instance is upgraded to a VM-300 BYOL instance? (Choose two.)

- A. UUID
- B. new Auth Code
- C. CPU ID
- D. API Key

Correct Answer: AC

In a public cloud deployment, if your firewall is licensed with the BYOL option, you must Deactivate VM before you change the instance type or VM type and apply the license again on the firewall after you complete the model or instance upgrade. When you change the instance type, because the firewall has a new UUID and CPU ID, the existing license will no longer be valid.
