QUESTION 1

When deploying an Eval Next-Generation Firewall (NGFW) within a customer environment for the purpose of generating a Security Lifecycle Review (SLR) report, creation of which interface will not impact production traffic?

- A. Layer 3 interface
- B. SLR interface
- C. virtual wire interface
- D. TAP interface

Correct Answer: D

QUESTION 2

A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- A. The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- B. Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- C. There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- D. Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

Correct Answer: C

QUESTION 3

Which subscription should be activated when a predefined, known malicious IP address is updated?

- A. WildFire
- B. Cortex Data Lake
- C. Threat Prevention
- D. URL Filtering

Correct Answer: D

QUESTION 4

Which section of a Security Lifecycle Review (SLR) report summarizes risk exposure by breaking down a detected attack on the network?

- A. Advanced URL Filtering Analysis
- B. SaaSApplications
- C. Threats at a Glance
- D. Applications that Introduce Risk

Correct Answer: C

QUESTION 5

Using a comprehensive range of natively-integrated subscriptions and inline machine learning (ML), what does a Next-Generation Firewall (NGFW) use to prevent known and unknown threats in real time?

- A. Cloud Delivered Security Services (CDSS)
- B. Cloud Security Posture Management (CSPM)
- C. Cloud NativeSecurity Platform (CNSP)
- D. Cloud Identity Access Management (CIAM)

Correct Answer: A
